EXP NO1: Flight Reservation System

Aim:

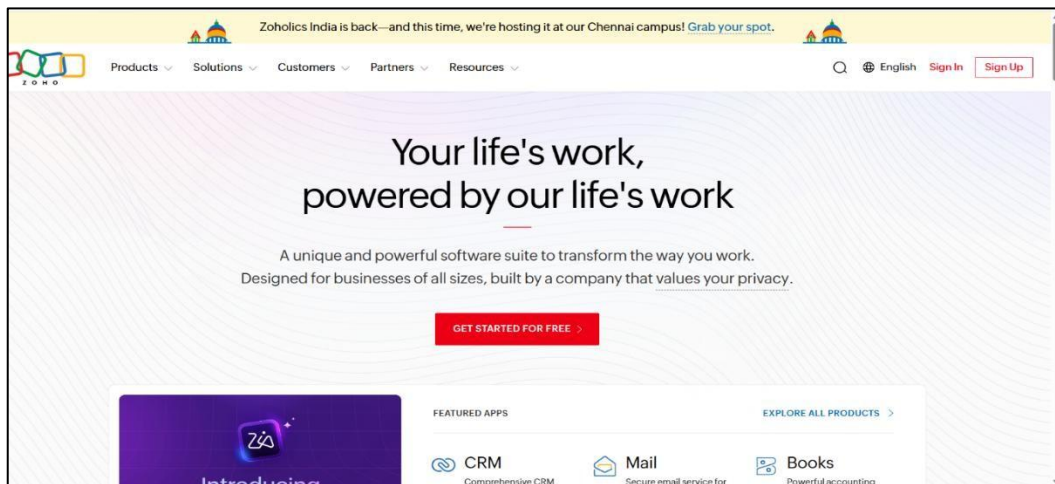

To develop a cloud-based Flight Reservation System using Zoho Creator to demonstrate SaaS.

Steps:

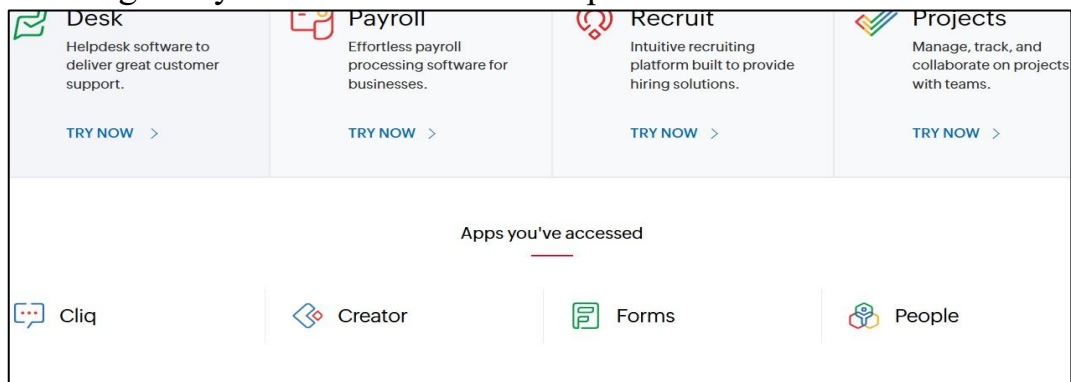

1. Log in to Zoho Creator and click Create New Application.
2. Create a Flight Reservation form.
3. Add fields: From, To, Departure Date, Return Date, Travelers, Class, Fare Type, Flight Type, and Passenger Name.
4. Save the form and create a report to display reservation records.
5. Enter sample data, verify the records, and publish the application.

Implemented:

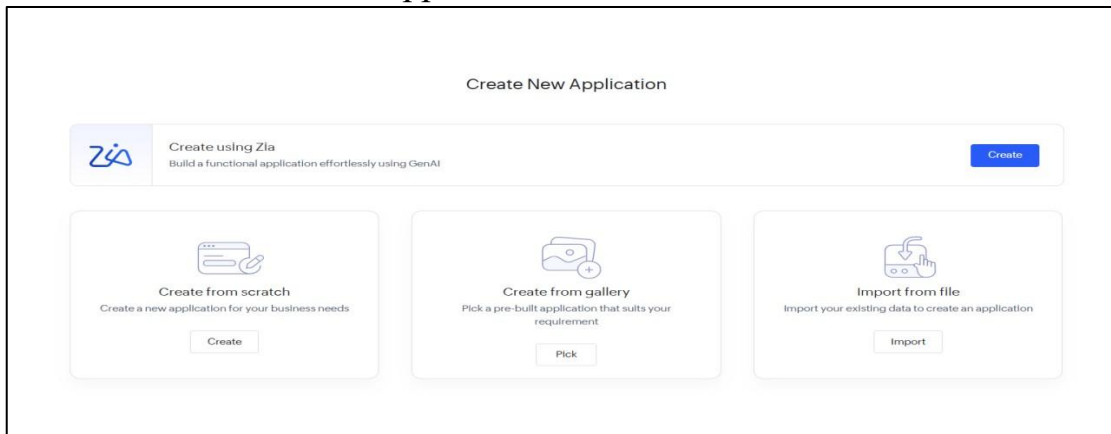

Step 1: Go to zoho.com

STEP 2: Login to your Zoho account and open Zoho Creator

STEP 3: Click Create New Application and select Create from Scratch

STEP 4: Enter Flight Reservation System as the application name and click Create Application.

EXP NO 2: Property Buying & Rental System

Aim:

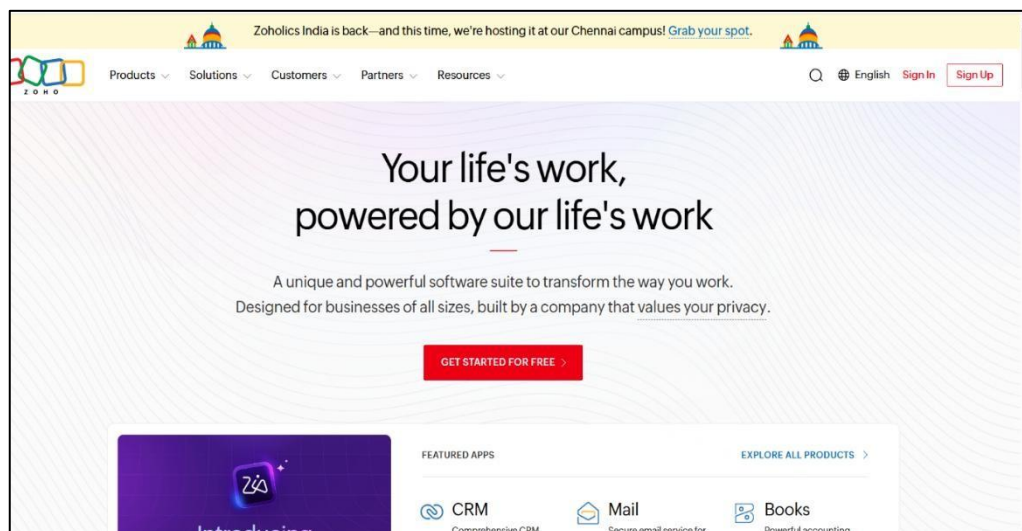

To create a cloud-based Property Buying & Rental System using Zoho Creator.

Steps:

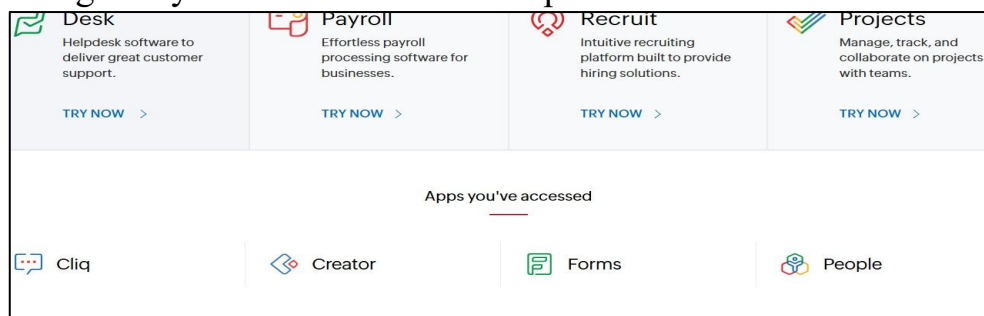

1. Create a new application in Zoho Creator.
2. Create a Property Details form.
3. Add fields: Buy/Rent, Property Type, Area, Location, Price, Rental Agreement, and Owner Details.
4. Create reports to view and search property records.
5. Test the application by entering sample property details.

Implemented

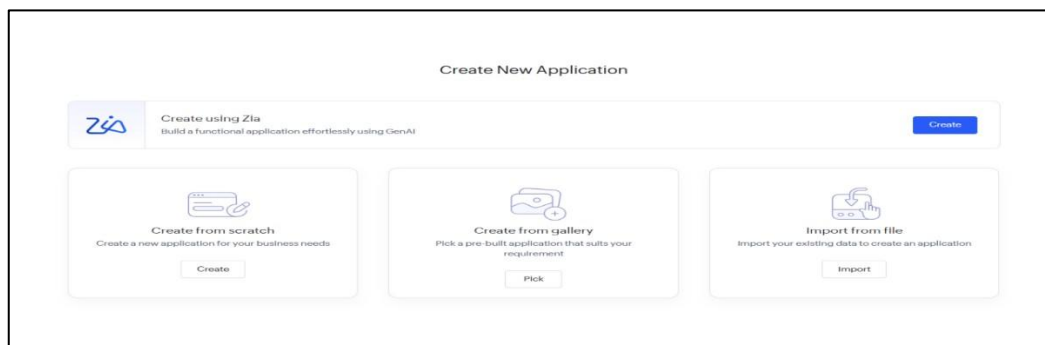

Step 1: Go to zoho.com

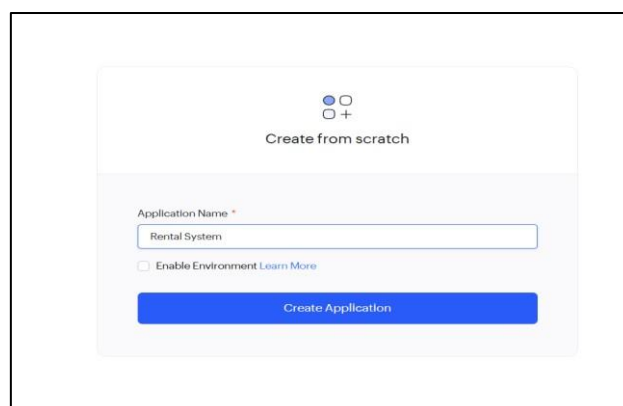

STEP 2: Login to your Zoho account and open Zoho Creator

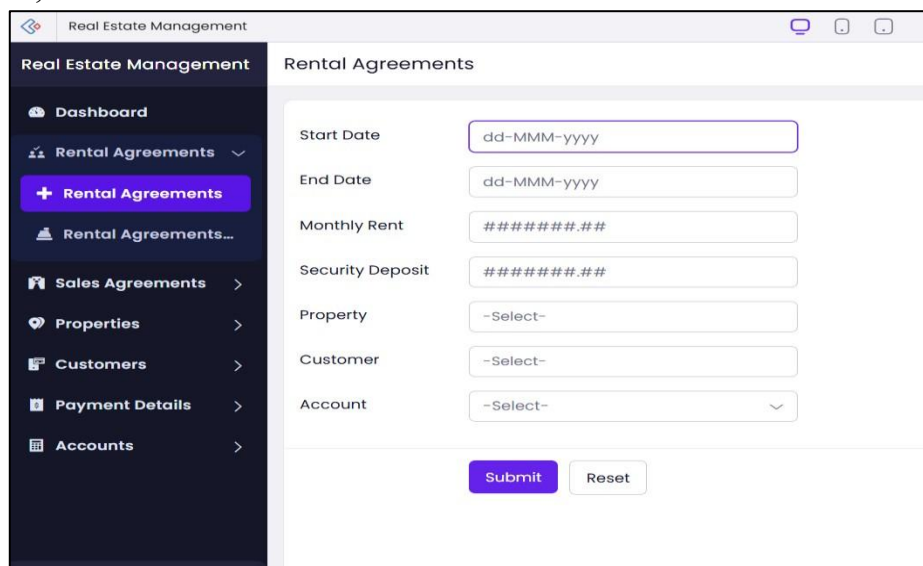

STEP 3: Click Create New Application and select Create from Scratch

STEP 4: Enter Rental System as the application name and click Create Application.

Step 5: Add fields: Buy/Rent, Property Type, Area, Location, Price, Rental Agreement, and Owner Details.

EXP NO 3: Car Booking Reservation System

Aim:

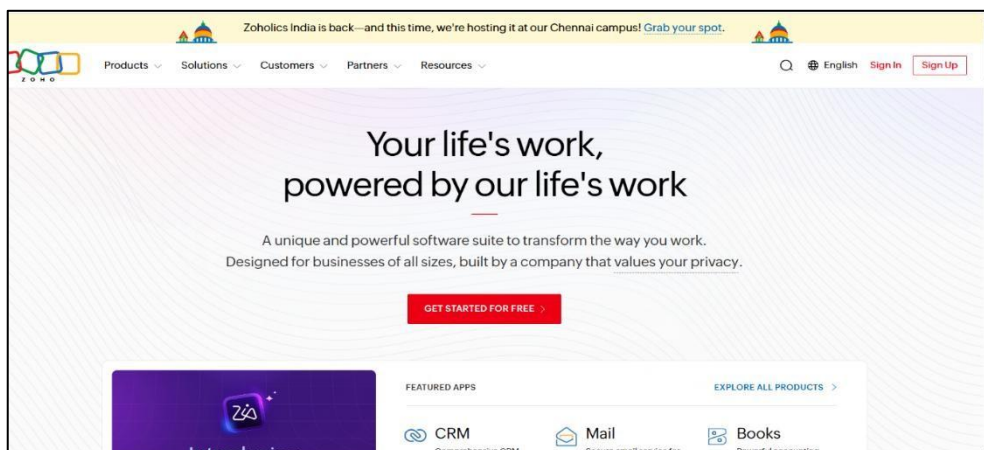

To develop a cloud-based Car Booking Reservation System using Zoho Creator.

Steps:

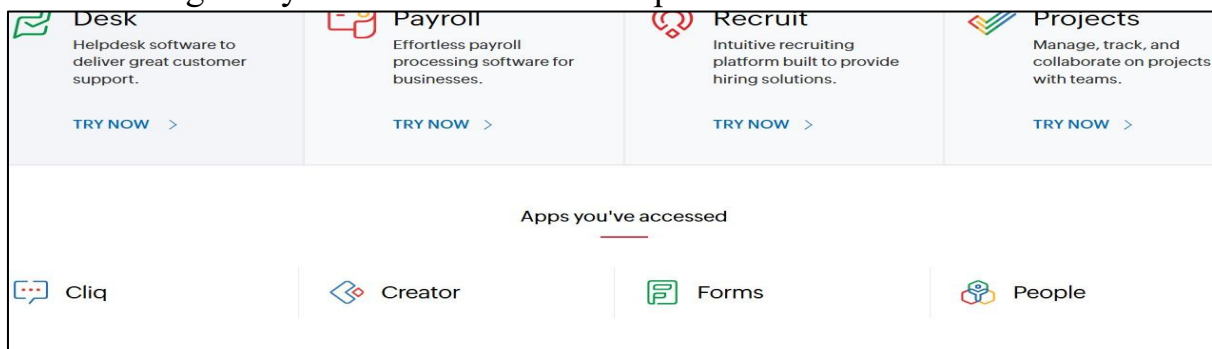

1. Create a new application in Zoho Creator.
2. Create a Car Booking form.
3. Add fields: Customer Name, Pickup Location, Drop Location, Rental/Outstation, Package Type, Date, and Duration.
4. Create reports to display booking details.
5. Enter sample bookings and verify the records.

Implemented

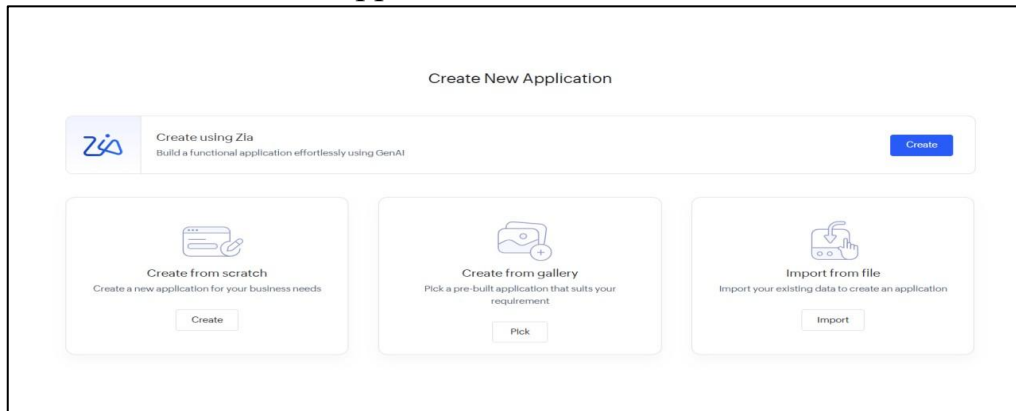

Step 1: Go to zoho.com

STEP 2: Login to your Zoho account and open Zoho Creator

STEP 3: Click Create New Application and select Create from Scratch

STEP 4: Enter Car Booking Reservation as the application name and click Create Application.

The screenshot shows the 'Create from scratch' form. It has a header 'Create from scratch' with a logo. Below it, there's a form with the following fields:

- Application Name ***: A text input field containing 'Car Booking Reservation'.
- Enable Environment**: A checkbox that is currently unchecked, with a link to 'Learn More'.
- Create Application**: A large blue button at the bottom.

Step 5: Add fields: Customer Name, Pickup Location, Drop Location, Rental/Outstation, Package Type, Date, and Duration.

The screenshot shows the 'Car Booking Management' application interface. On the left is a sidebar with navigation links: Dashboard, Bookings, Bookings Report, Board, Driver Assignments, Vehicle Availability, Drivers, Payments, Vehicles, and Fare Calculations. The 'Bookings' link is highlighted. The main content area is titled 'Bookings' and contains a form with the following fields:

- Customer**: A text input field.
- Driver**: A dropdown menu with '-Select-'.
- Vehicle**: A dropdown menu with '-Select-'.
- Pickup Location**: A text input field.
- Drop Location**: A text input field.
- Pickup Date Time**: A text input field with a date and time format 'dd-MMM-yyyy HH:mm:ss'.
- Drop Date Time**: A text input field with a date and time format 'dd-MMM-yyyy HH:mm:ss'.
- Distance KM**: A text input field with a format '#####'.
- Estimated Fare**: A text input field with a format '#####.###'.
- Booking Status**: A dropdown menu with '-Select-'.

Step 7:

EXP NO 4: Library Book Reservation System

Aim:

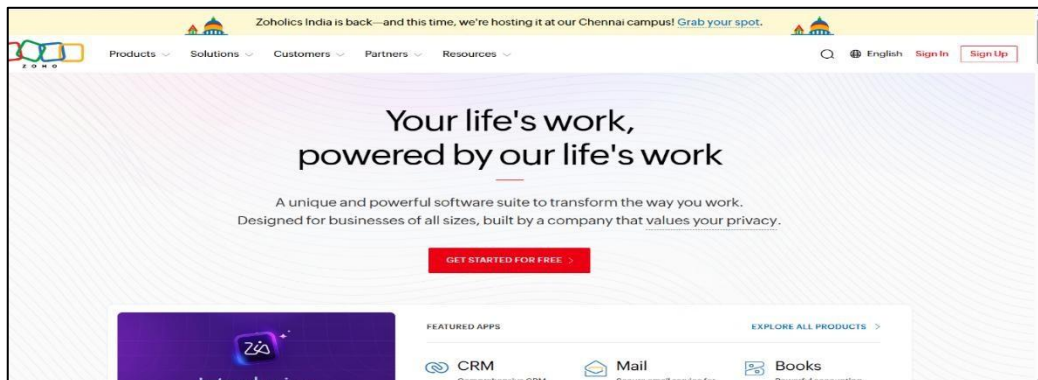

To create a cloud-based Library Book Reservation System using Zoho Creator.

Steps:

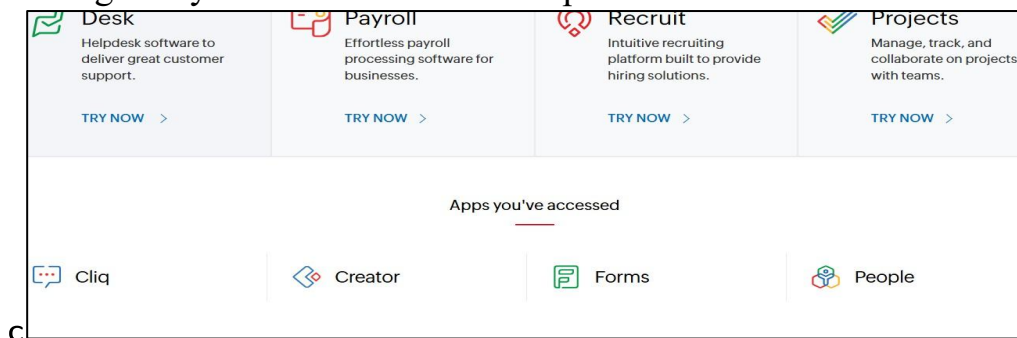

1. Create a new application.
2. Create a Book Reservation form.
3. Add fields: Book Title, Author, Publication, Edition, Rack Number, Number of Copies, and Status.
4. Create a report to display available and reserved books.
5. Test the application with sample book records.

Implemented

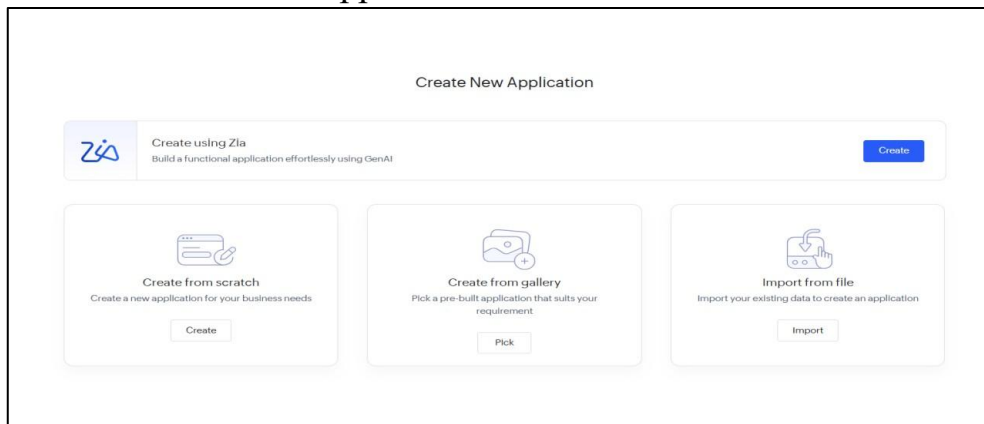

Step 1: Go to zoho.com

STEP 2: Login to your Zoho account and open Zoho Creator

STEP 3: Click Create New Application and select Create from Scratch

STEP 4: Enter Library Book Reservation System as the application name and click Create Application.

The screenshot shows the 'Create from scratch' form. It has a title 'Create from scratch' with a logo. Below the title, there's a form with a text input field for 'Application Name' containing 'Library Book Reservation System'. There's also a checkbox for 'Enable Environment' and a 'Create Application' button.

Step 5: Add fields: Book Title, Author, Publication, Edition, Rack Number, Number of Copies, and Status

The screenshot shows the 'Library Management System' application. The left sidebar has a navigation menu with 'Issue Records' selected. The main content area shows the 'Issue Records' form with fields for Student, Book, Issue Date, Return Date, Due Date, Status, Fine Amount, and Returned By. The 'Submit' button is highlighted.

The screenshot shows the 'Borrowing History' form in the Library Management System. The left sidebar contains a menu with options: Dashboard, Issue Records, Borrowing History (selected), Board, Books, Students, Return Records, Dashboard Metrics, and Items. The main form area has the following fields: Student (text input), Book (dropdown menu), Issue Date (date input with format dd-MMM-yyyy), Return Date (date input with format dd-MMM-yyyy), Status (dropdown menu), and Fine Collected (text input with format #####.##). At the bottom of the form are 'Submit' and 'Reset' buttons.

The screenshot shows the 'Books' form in the Library Management System. The left sidebar contains a menu with options: Dashboard, Issue Records, Borrowing History, Books (selected), Books Report, Board, Students, Return Records, Dashboard Metrics, and Items. The main form area has the following fields: Title (text input), Author (text input), Publication (text input), Edition (text input), Year (text input with format #####), Rack Number (text input), Copies (text input with format #####), Available Copies (text input with format #####), Status (dropdown menu), and Item (dropdown menu). At the bottom of the form are 'Submit' and 'Reset' buttons.

The screenshot shows the 'Students' form in the Library Management System. The left sidebar contains a menu with options: Dashboard, Issue Records, Borrowing History, Books, Students (selected), Students Report, Board, Return Records, Dashboard Metrics, and Items. The main form area has the following fields: First Name (text input), Last Name (text input), Email (text input), Phone (text input with a country code dropdown set to +91 and a value of 81234 56789), Enrollment Date (date input with format dd-MMM-yyyy), Status (dropdown menu), and User (text input). At the bottom of the form are 'Submit' and 'Reset' buttons.

STEP 6: Save the form, enter sample booking records, and view them in the Library Book Reservation System.

EXP NO 5: Mark Sheet Processing System

Aim:

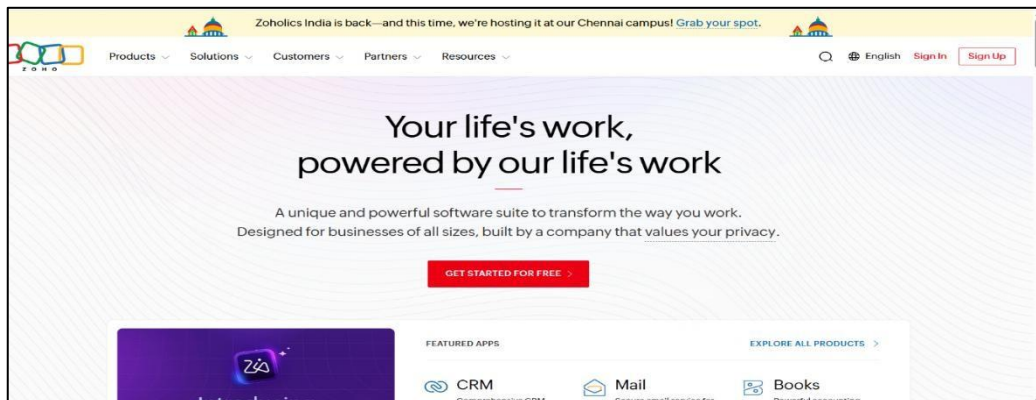

To develop a cloud-based Mark Sheet Processing System using Zoho Creator.

Steps:

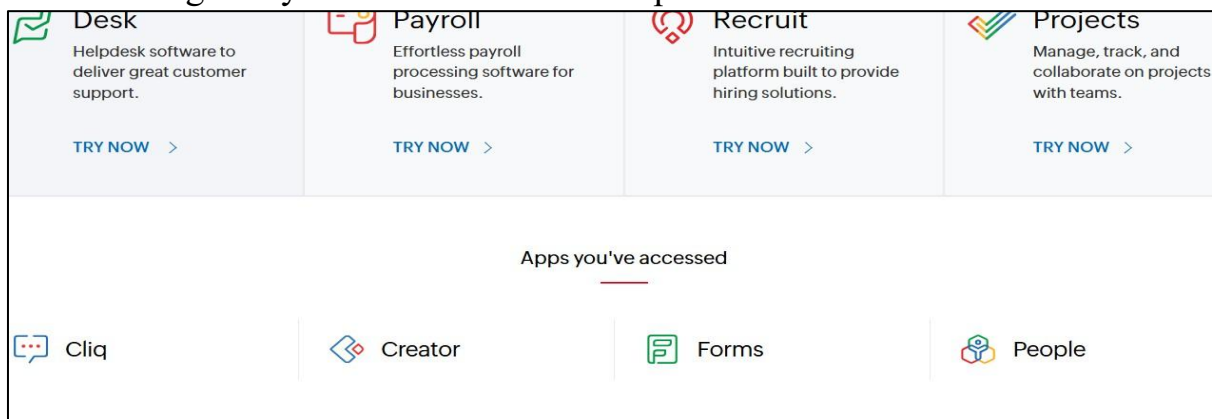

1. Create a new application.
2. Create a Student Mark Sheet form.
3. Add fields: Student Name, Register Number, Subject Marks, Total, Average, Percentage, and Rank.
4. Use formulas to calculate Total, Average, and Percentage.
5. Save the records and verify the generated mark sheet.

Implemented

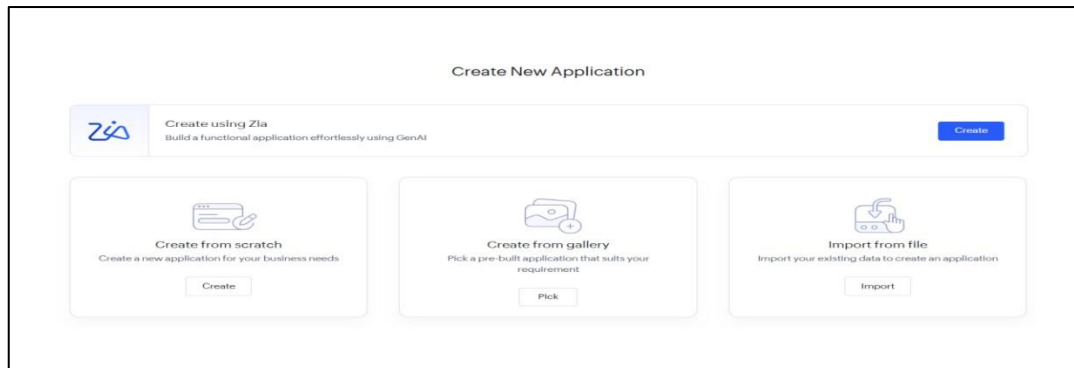

Step 1: Go to zoho.com

STEP 2: Login to your Zoho account and open Zoho Creator

STEP 3: Click Create New Application and select Create from Scratch

STEP 4: Enter Mark Sheet Processing System as the application name and click Create Application.

Step 5: Add fields: Student Name, Register Number, Subject Marks, Total, Average, Percentage, and Rank.

EXP NO 6: Payroll Processing System

Aim:

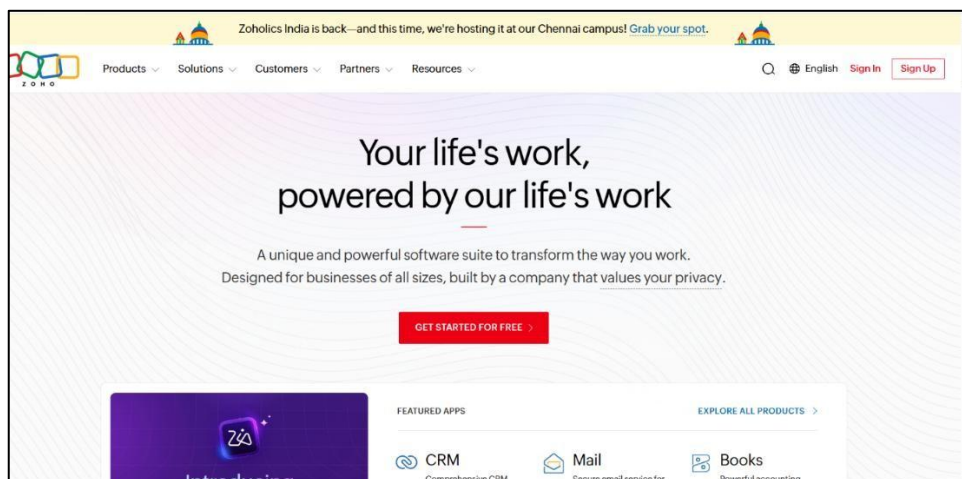

To create a cloud-based Payroll Processing System using Zoho Creator.

Steps:

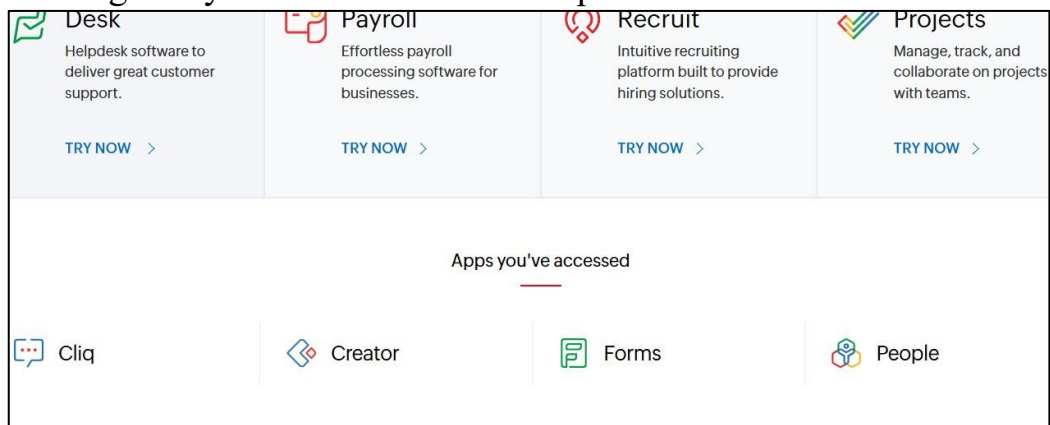

1. Create a new application.
2. Create an Employee Payroll form.
3. Add fields: Employee Name, Experience, Basic Pay, HRA, DA, TA, Gross Pay, and Net Pay.
4. Use formulas to calculate Gross Pay and Net Pay.
5. Save employee details and verify the payroll report.

Implemented:

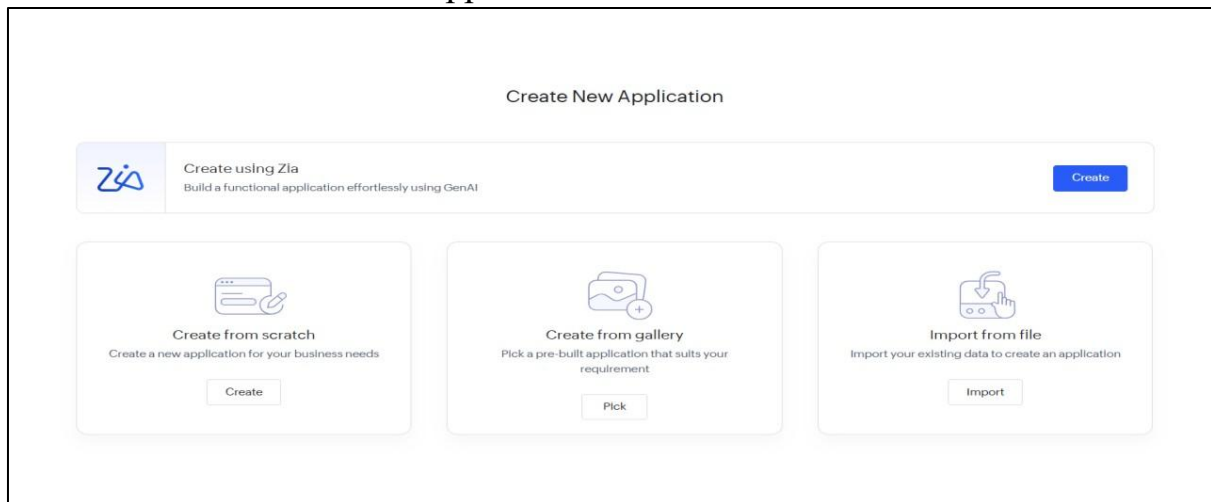

Step 1: Go to zoho.com

STEP 2: Login to your Zoho account and open Zoho Creator

STEP 3: Click Create New Application and select Create from Scratch

STEP 4: Enter Payroll Processing System as the application name and click Create Application.

The screenshot shows the 'Create from scratch' form. It has a title 'Create from scratch' and a subtitle 'Create a new application for your business needs'. Below the title, there's a text input field for 'Application Name' with the value 'Payroll Processing System'. There's a checkbox for 'Enable Environment' and a link 'Learn More'. At the bottom, there's a large blue button labeled 'Create Application'.

Step 5: Add fields: Student Name, Register Number, Subject Marks, Total, Average, Percentage, and Rank.

The screenshot shows the 'Payroll Management System' interface. On the left, there's a sidebar with a menu: 'Dashboard', 'Employees', 'Employees Report', 'Board', 'Attendance Recorder', 'Employee Salary', 'Department Summary', 'Payroll Calculation', 'Salary Slips', and 'Payroll History'. The 'Employees' menu item is selected. The main content area is titled 'Employees' and contains a form with the following fields: 'Employee ID' (dropdown), 'First Name' (text), 'Last Name' (text), 'Date of Joining' (date), 'Date of Birth' (date), 'Gender' (dropdown), 'Employment Type' (dropdown), 'Department' (dropdown), 'Designation' (dropdown), and 'Email Address' (text). At the bottom, there's a 'Add Employee' button.

Step 7:Final Dashboard

EXP NO 7: Student Attendance System

Aim:

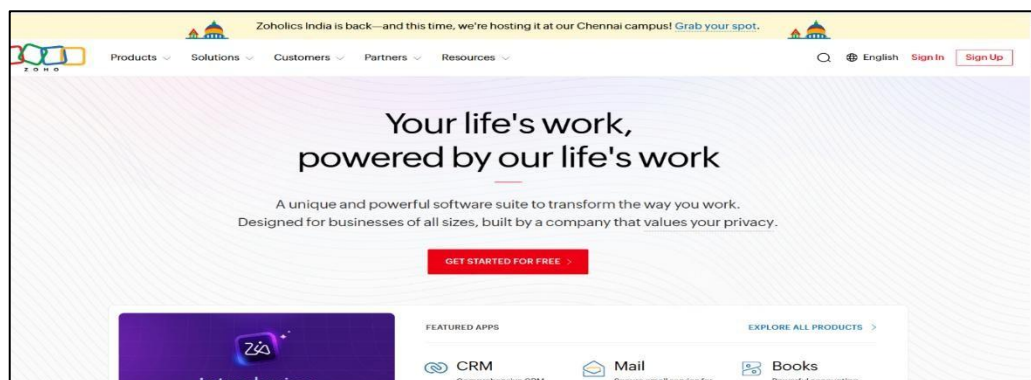

To develop a cloud-based Student Attendance System using Zoho Creator.

Steps:

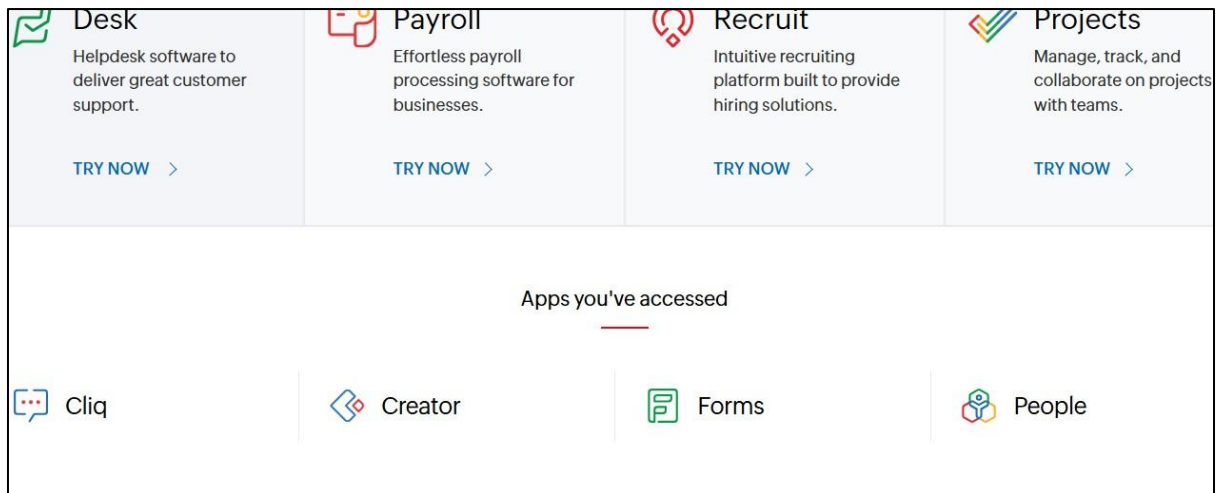

1. Create a new application.
2. Create a Student Attendance form.
3. Add fields: Student Name, Course, Date, Present/Absent, Attendance Percentage, and OD Request.
4. Create reports to display attendance records.
5. Test the application by entering attendance details.

Implemented:

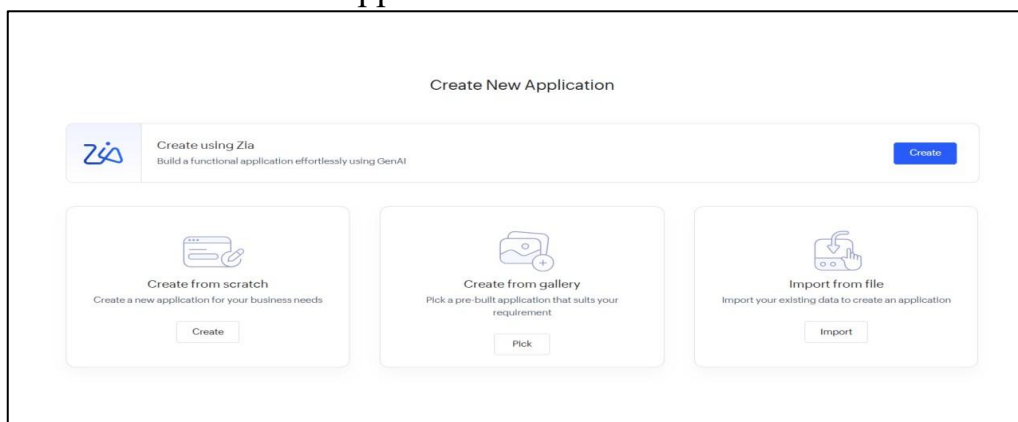

Step 1: Go to zoho.com

STEP 2: Login to your Zoho account and open Zoho Creator

STEP 3: Click Create New Application and select Create from Scratch

STEP 4: Enter Student Attendance System as the application name and click Create Application.

The 'Create from scratch' form includes an 'Application Name' field containing 'Student Attendance System'. Below this is an unchecked checkbox for 'Enable Environment' with a 'Learn More' link. A large blue 'Create Application' button is at the bottom.

Step 5: Add fields: Student Name, Course, Date, Present/Absent, Attendance Percentage, and OD Request.

EXP NO 8: Hospital Management

Aim:

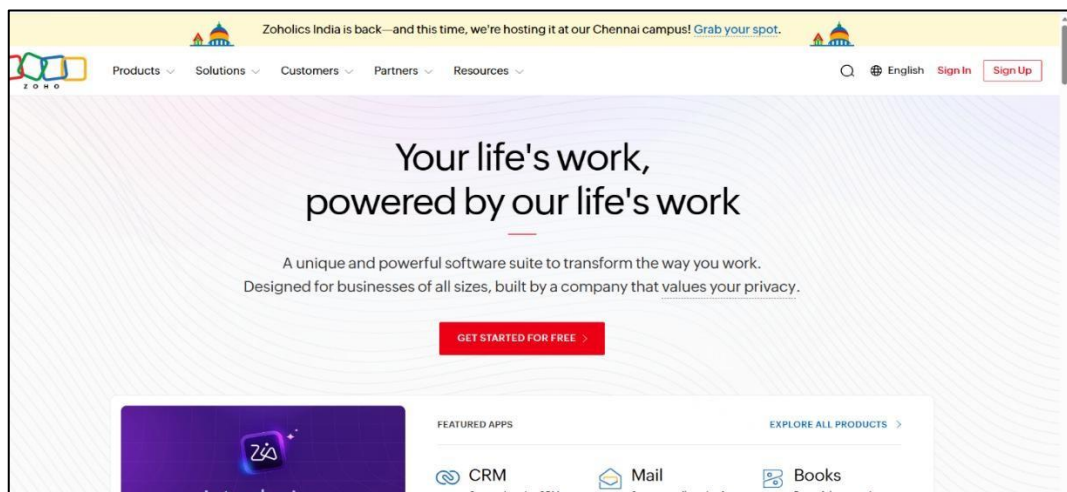

To develop a cloud-based Hospital Management using Zoho Creator.

Steps:

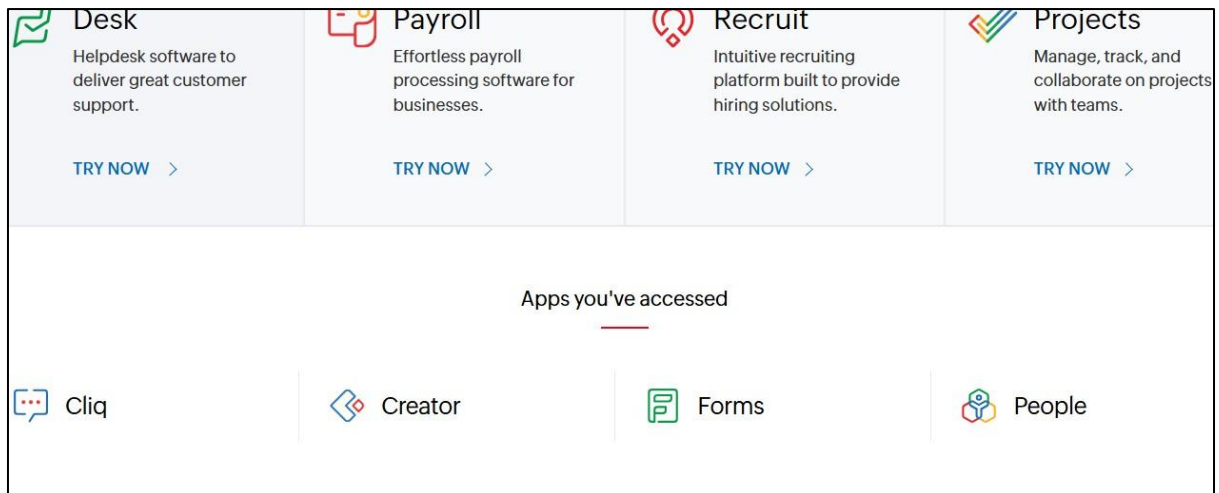

1. Create a new application.
2. Create a Hospital Management System
3. Add fields: Appointment Billing ,Patient ,Doctor
4. Create reports to display all above details
5. Test the application by entering attendance details.

Implemented:

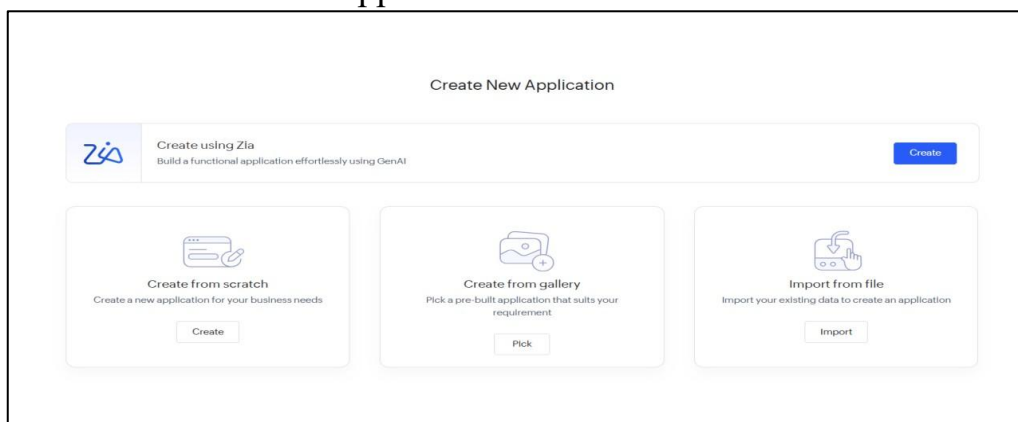

Step 1: Go to zoho.com

STEP 2: Login to your Zoho account and open Zoho Creator

STEP 3: Click Create New Application and select Create from Scratch

STEP 4: Enter Hospital Management as the application name and click Create Application.

The 'Create from scratch' form includes a text input field for 'Application Name' with the value 'Hospital Management'. Below the input field is a checkbox labeled 'Enable Environment' with a link 'Learn More'. At the bottom is a large blue button labeled 'Create Application'.

Step 5: Add fields

Category ID	Category Name	Description
5	Snacks & Beverages	Chips, cookies, and cold drinks selection
4	Meat & Poultry	Premium cuts and fresh chicken options
3	Bakery Items	Daily bread, pastries, and fresh cakes
2	Dairy & Eggs	Fresh milk, cheese, and farm-fresh eggs
1	Fresh Vegetables	Organic and locally sourced seasonal produce

STEP 7:Dashboard

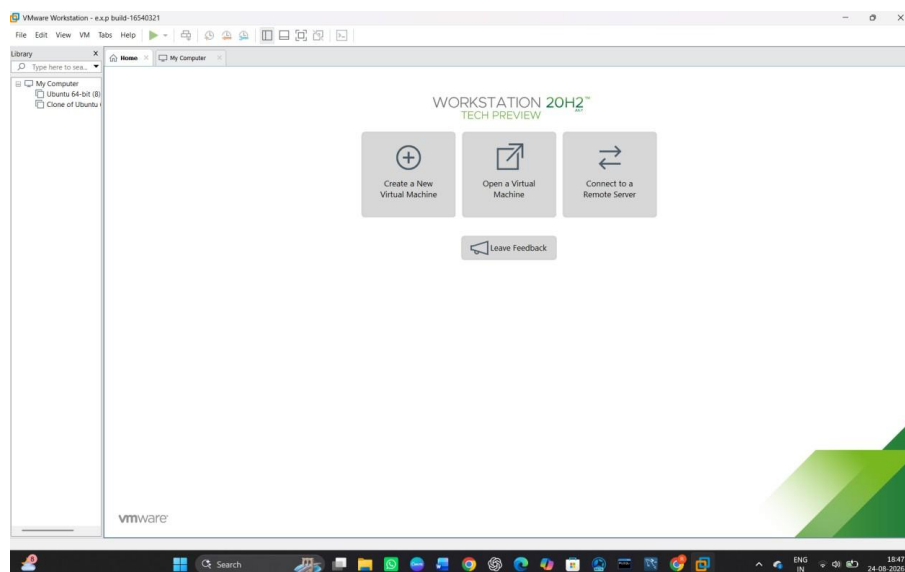

12.Install Virtualbox/VMware Workstation with different flavours of linux or windows OS on top of your present windows environment.

AIM:

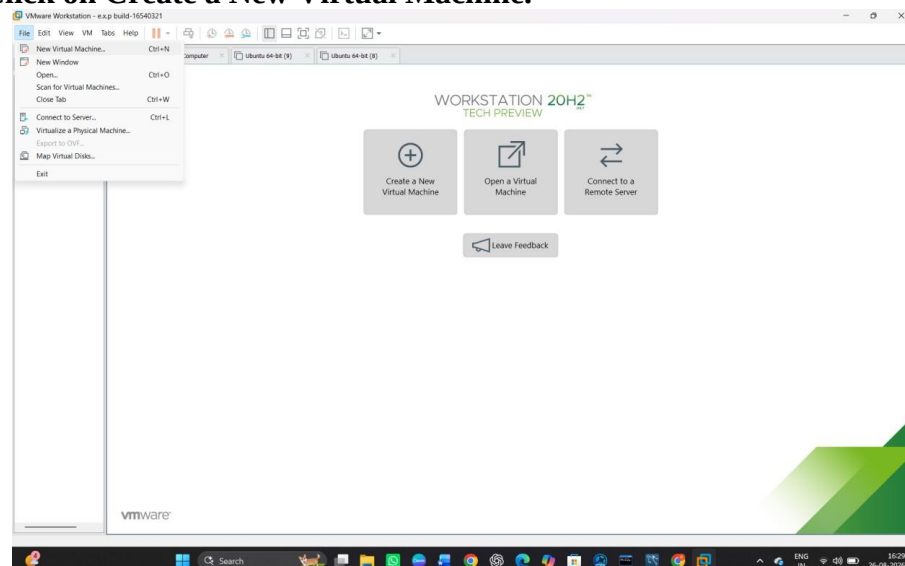

To install VMware Workstation and install a different flavour of Linux/Windows Operating System as a virtual machine on the existing Windows environment.

PROCEDURE:

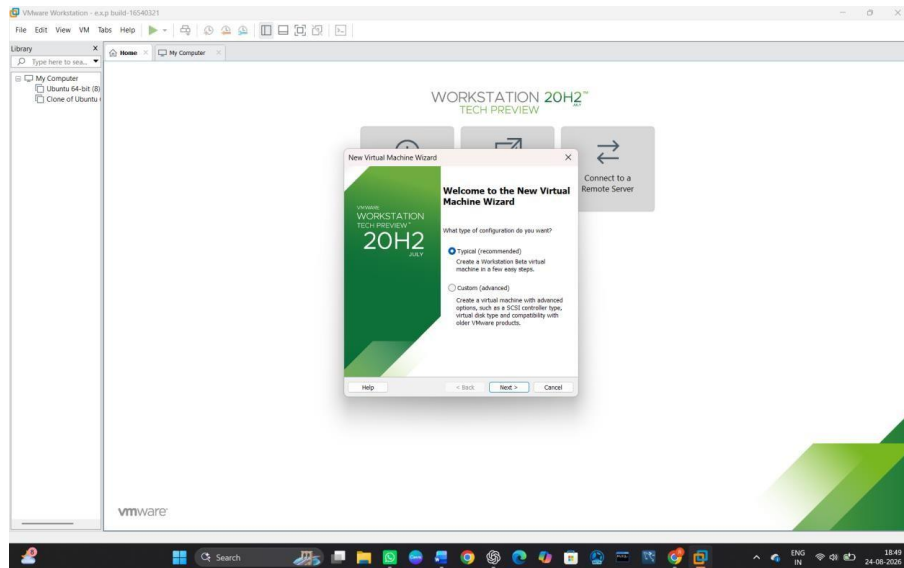

STEP 1: Go to VMware Workstation.

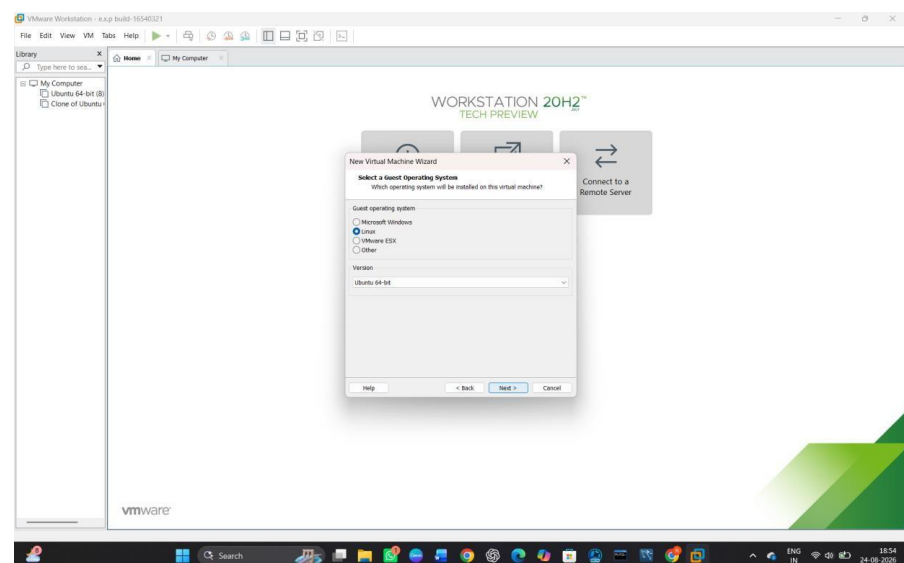

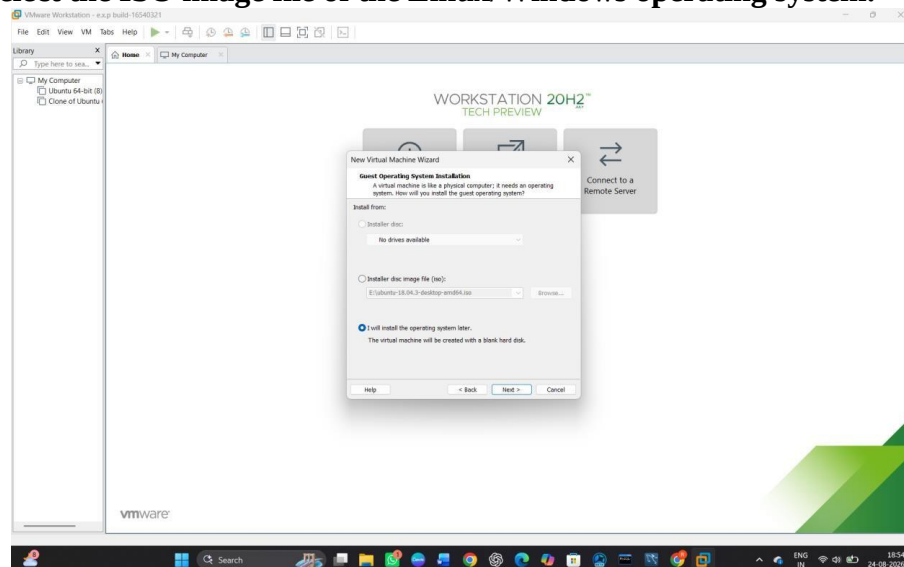

STEP 2: Click on Create a New Virtual Machine.

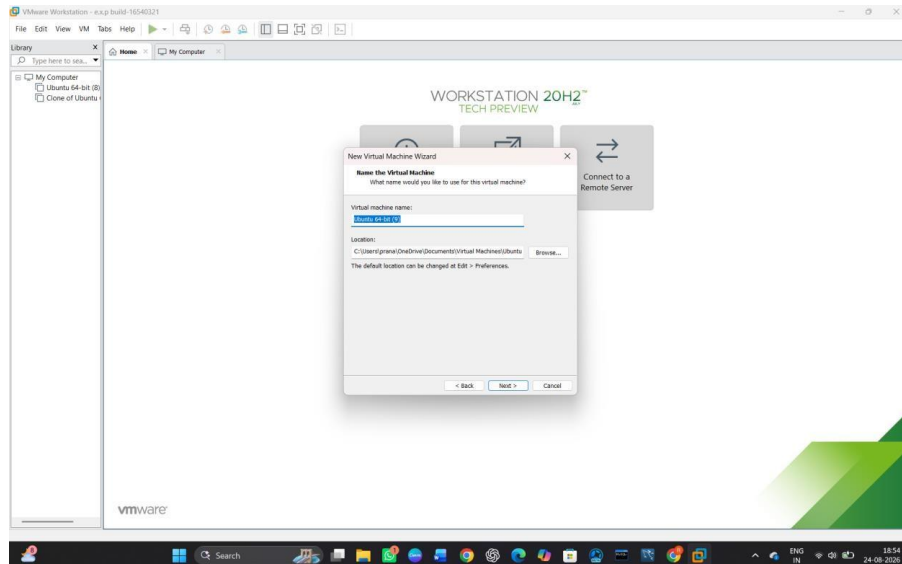

STEP 3: Select Typical (Recommended) and click Next.

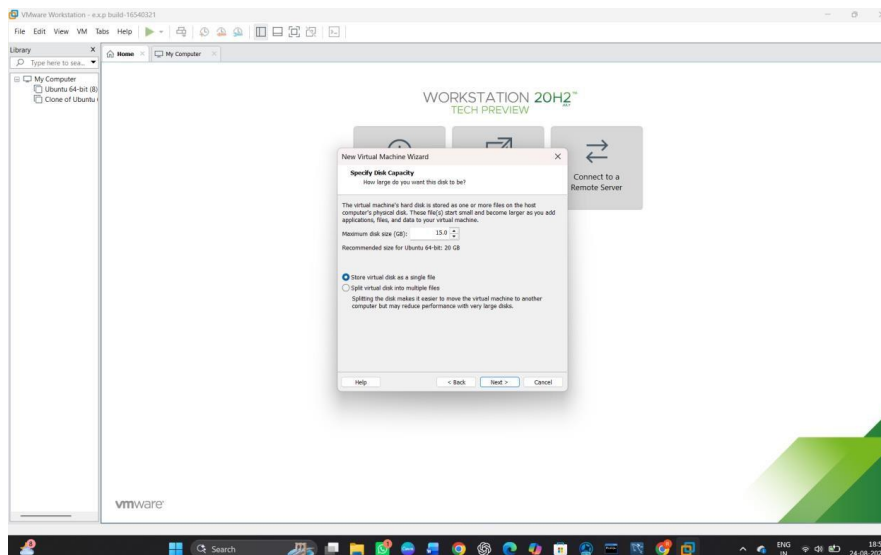

STEP 4: Select the ISO image file of the Linux/Windows operating system.

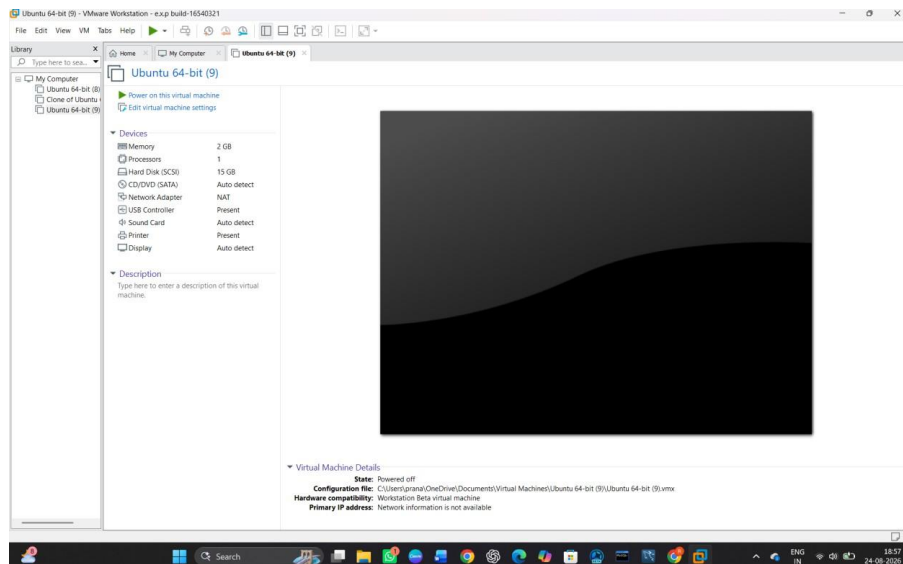

STEP 5: Enter the **Virtual Machine Name** and select the storage location.

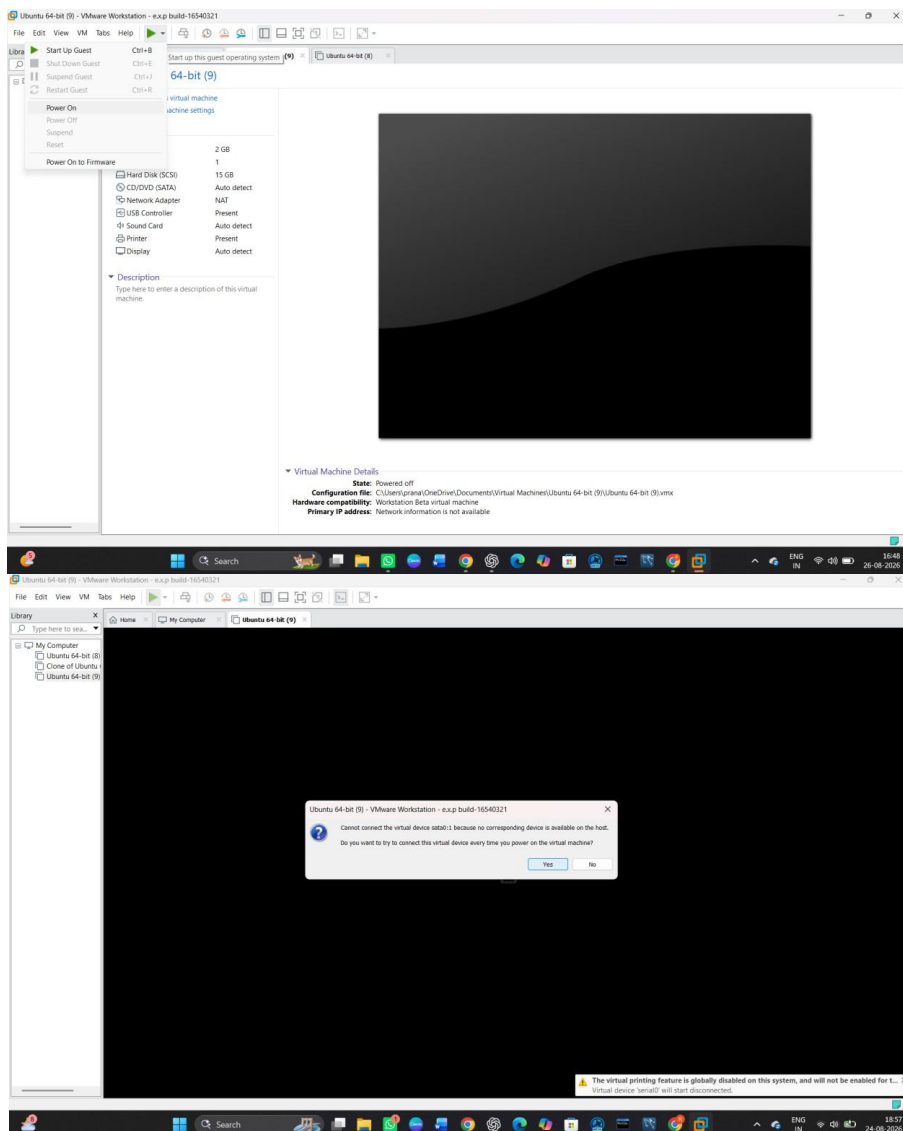

STEP 6: Specify the required **disk size** and click **Next**.

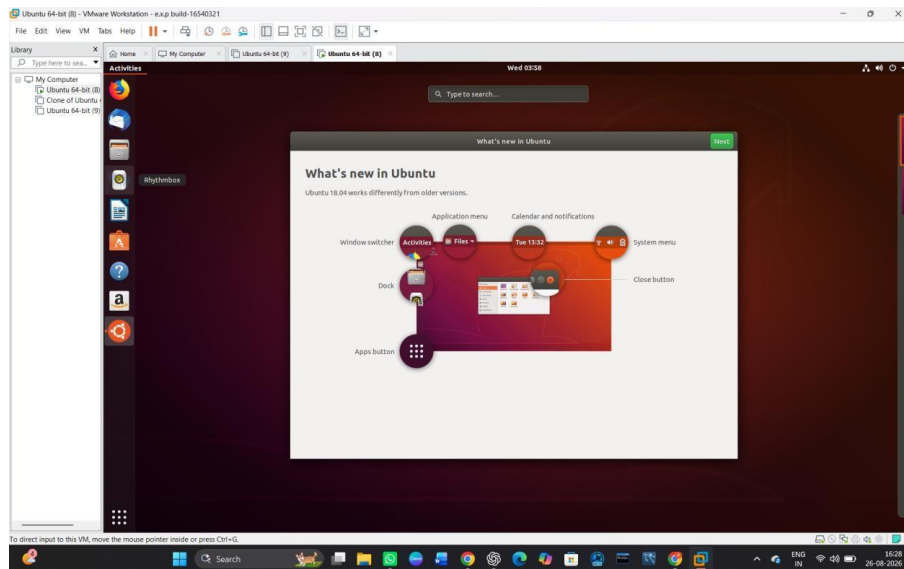

STEP 7: Click on **Customize Hardware** and configure the required **RAM** and processor.

STEP 8: Click Power on this virtual machine.

STEP 9: Install the selected Linux/Windows operating system by following the installation instructions.

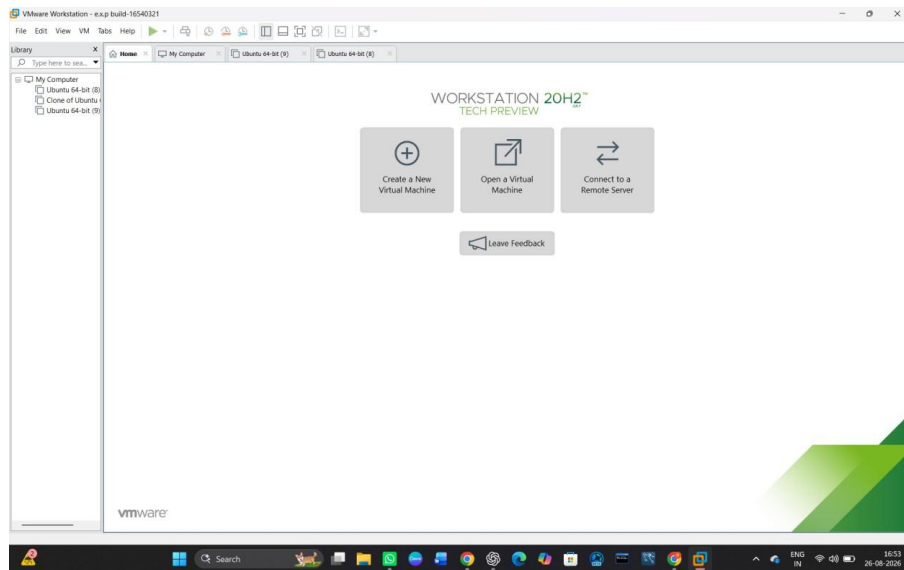

13. Install a C compiler in the virtual machine created using virtual box / VM Ware Workstation / Player and execute Simple C Programs.

AIM:

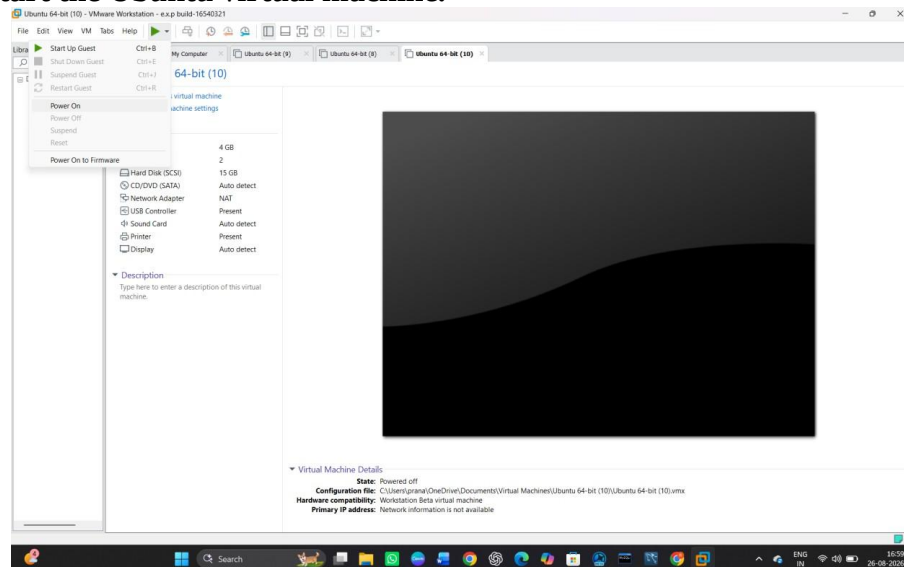

To install a **C compiler (GCC)** in the virtual machine created using **VMware Workstation** and execute simple C programs.

PROCEDURE:

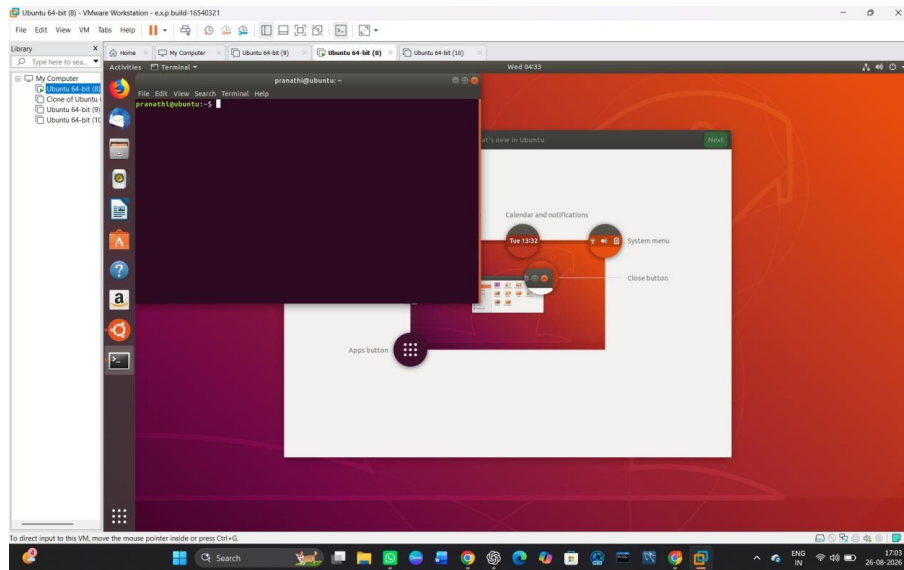

STEP 1: Go to **VMware Workstation**.

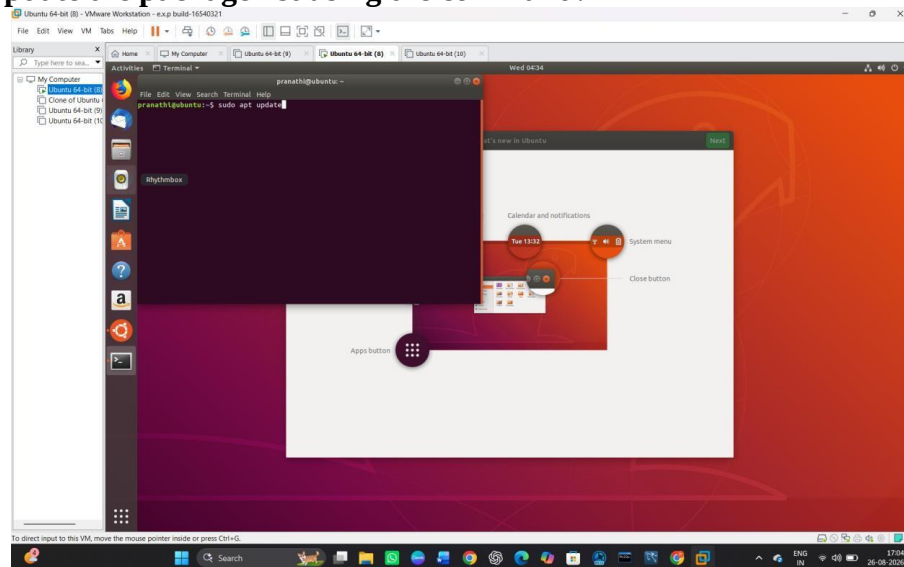

STEP 2: Start the Ubuntu virtual machine.

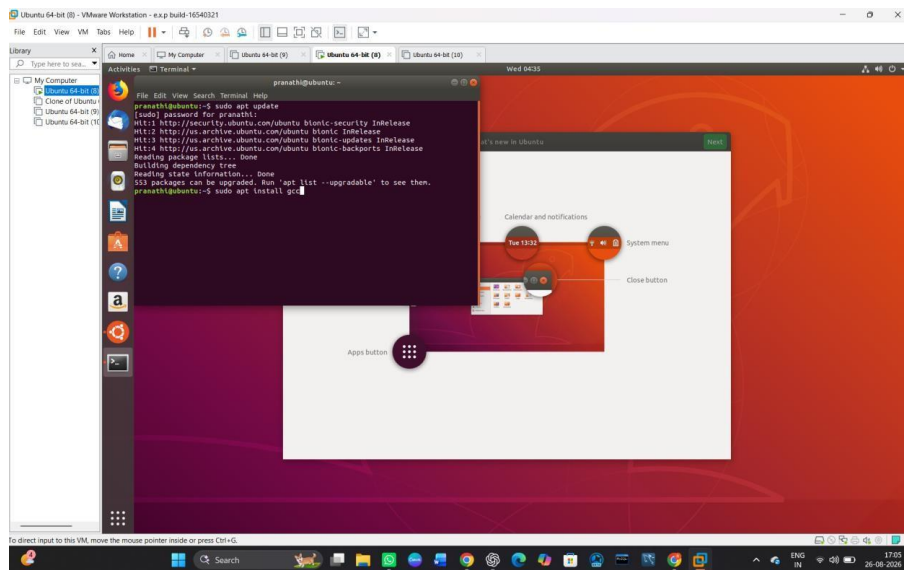

STEP 3: Open the **Terminal** in Ubuntu.

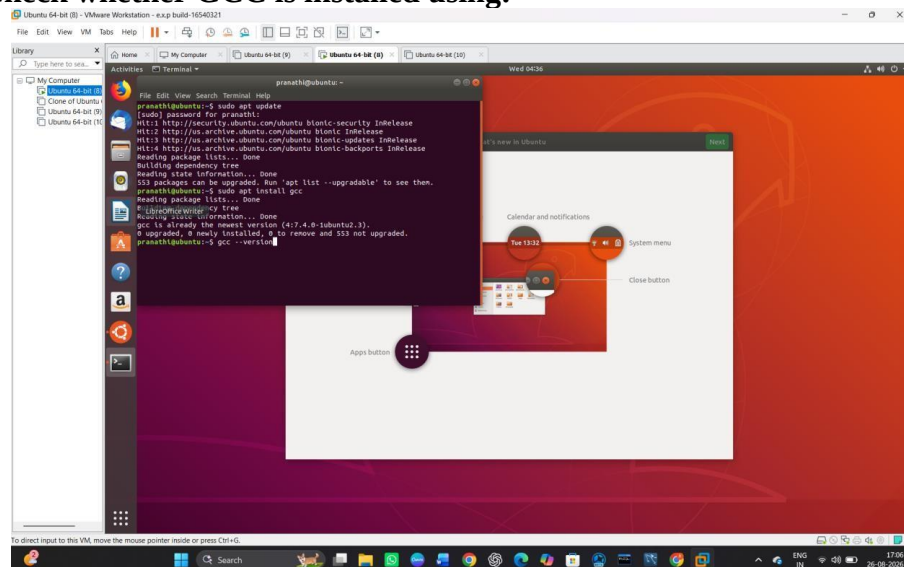

STEP 4: Update the package list using the command:

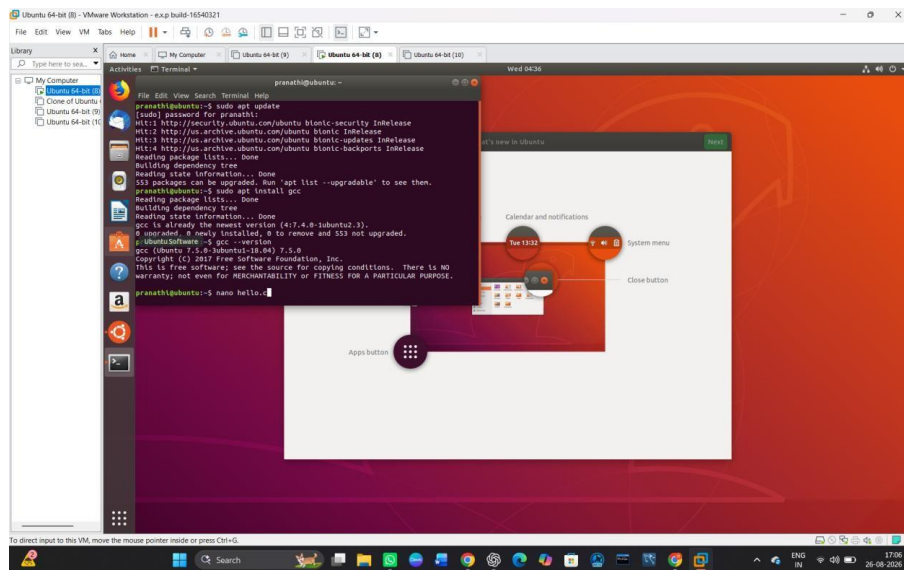

STEP 5: Install the GCC compiler using:

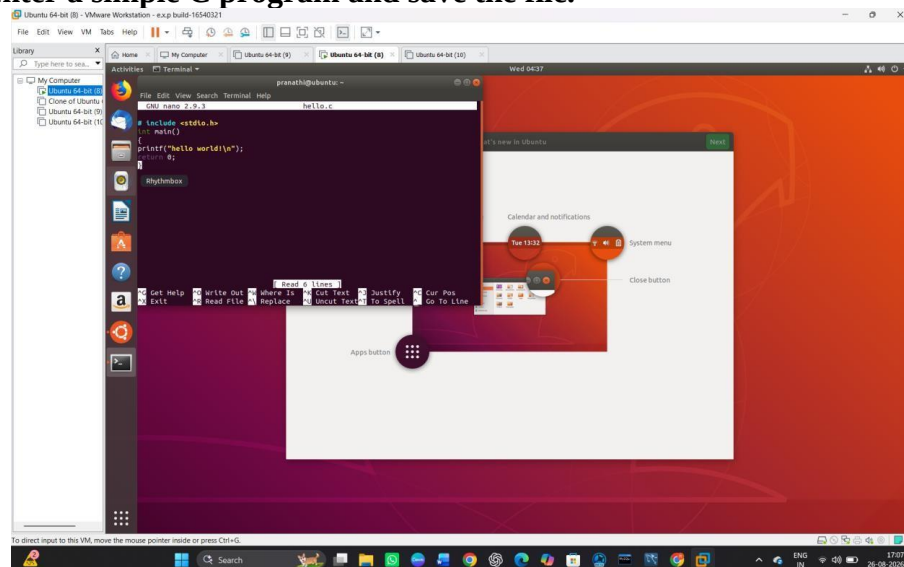

STEP 6: Check whether GCC is installed using:

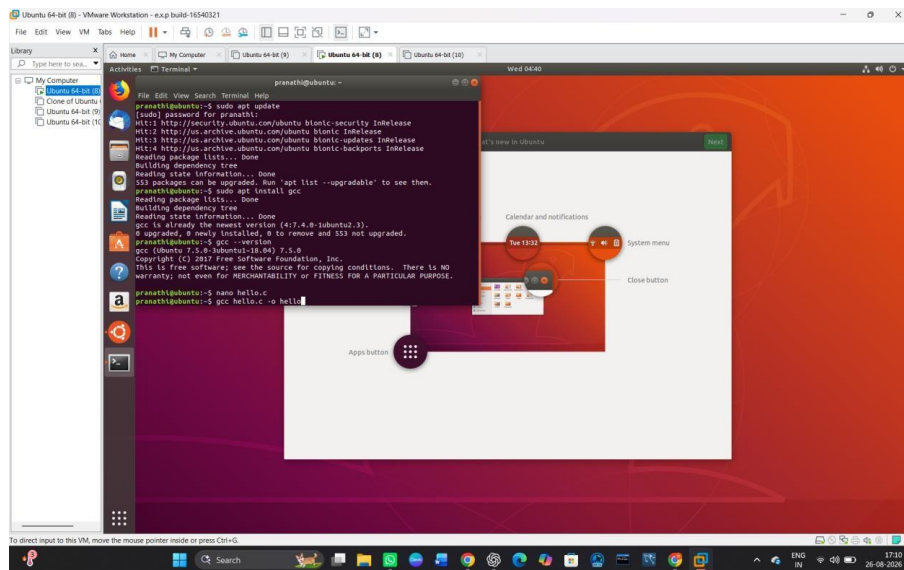

STEP 7: Create a C program using:

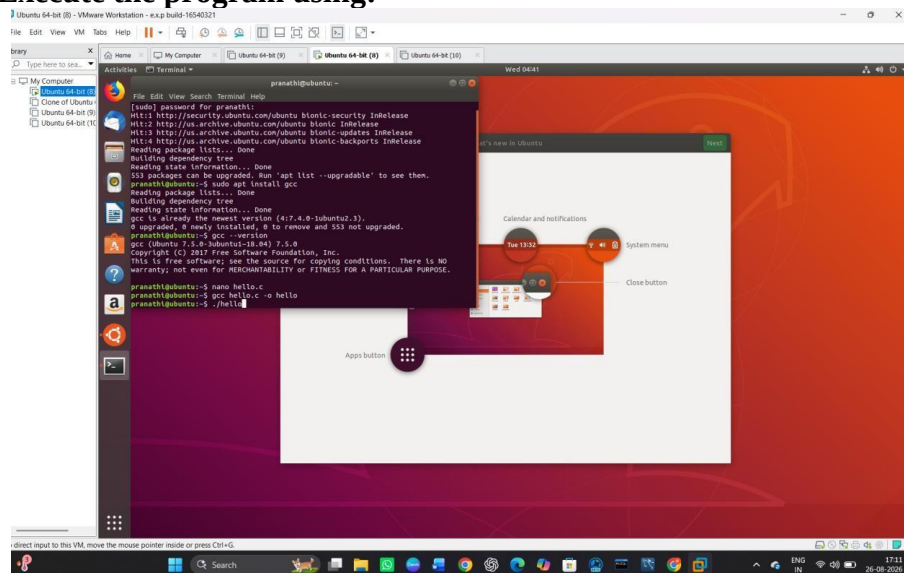

STEP 8: Enter a simple C program and save the file.

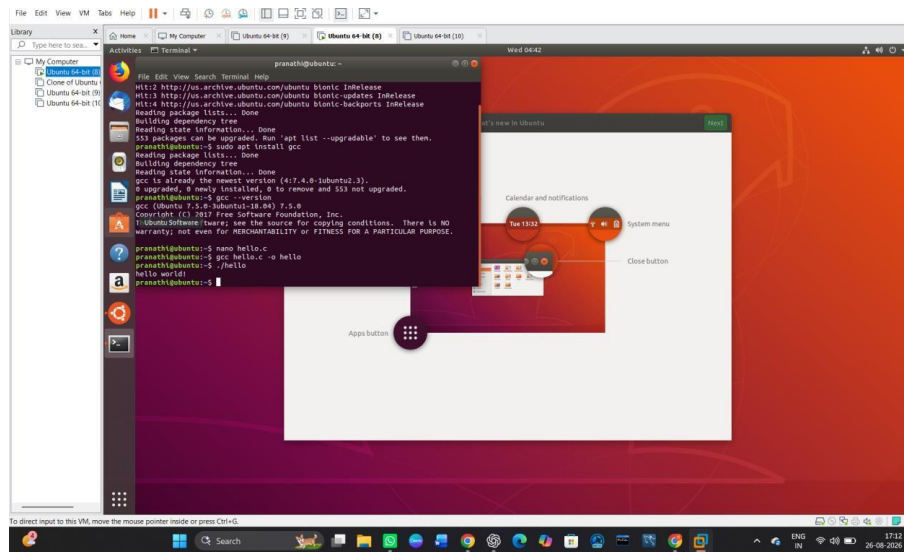

STEP 9: Compile the program using:

STEP 10: Execute the program using:

STEP 11: Successfully Executed C program

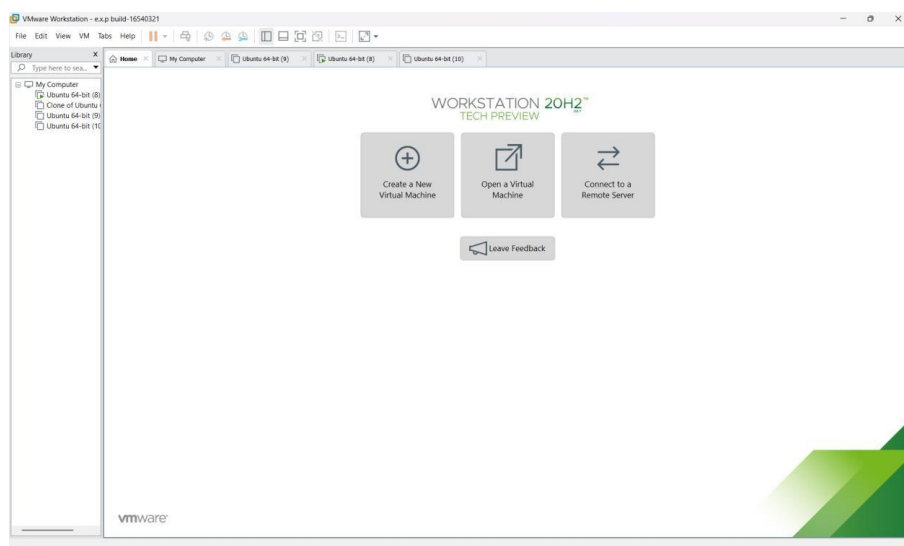

14.Install Virtualbox with different flavours of linux or windows OS on top of windows 10 using custom installation.

AIM:

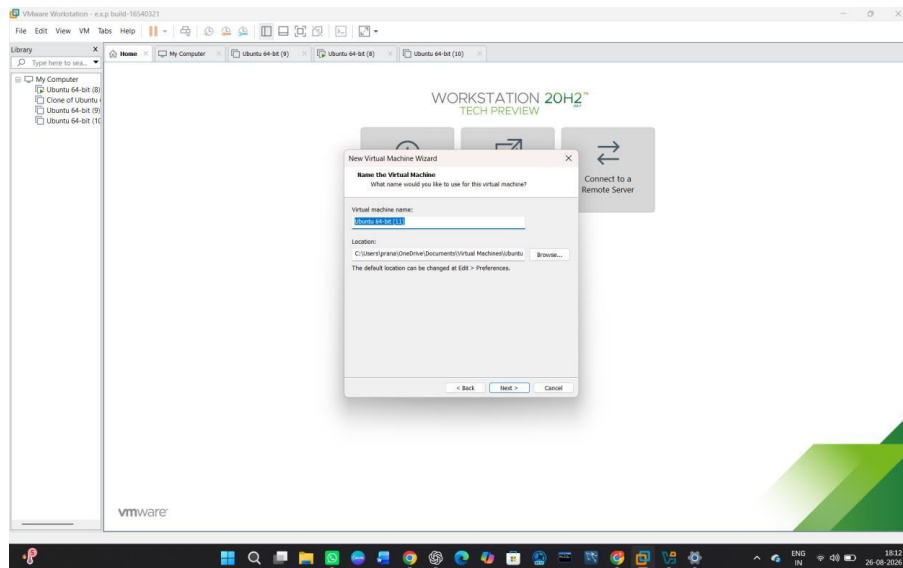

To install Oracle VirtualBox with a different flavour of Linux/Windows Operating System on top of the existing Windows 10 environment using Custom Installation.

PROCEDURE:

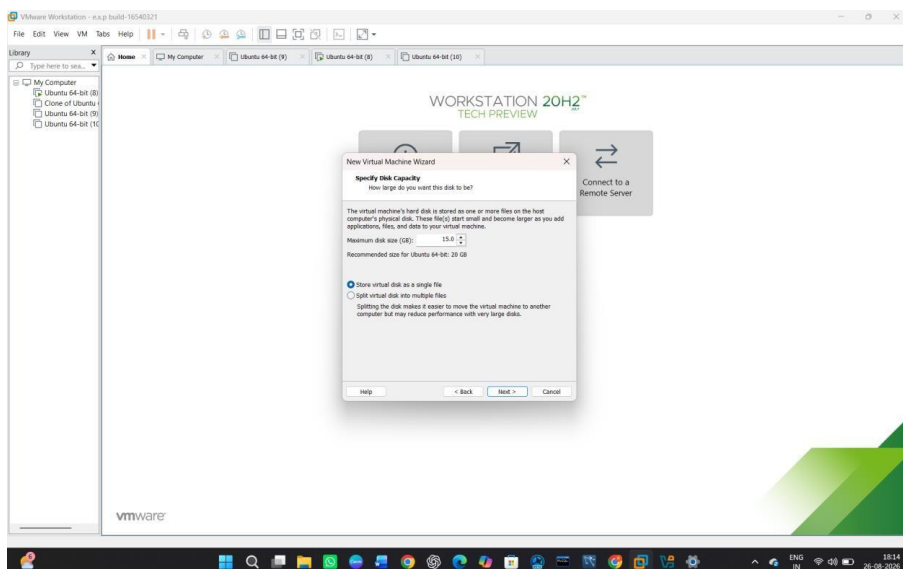

STEP 1: Open VMware Workstation

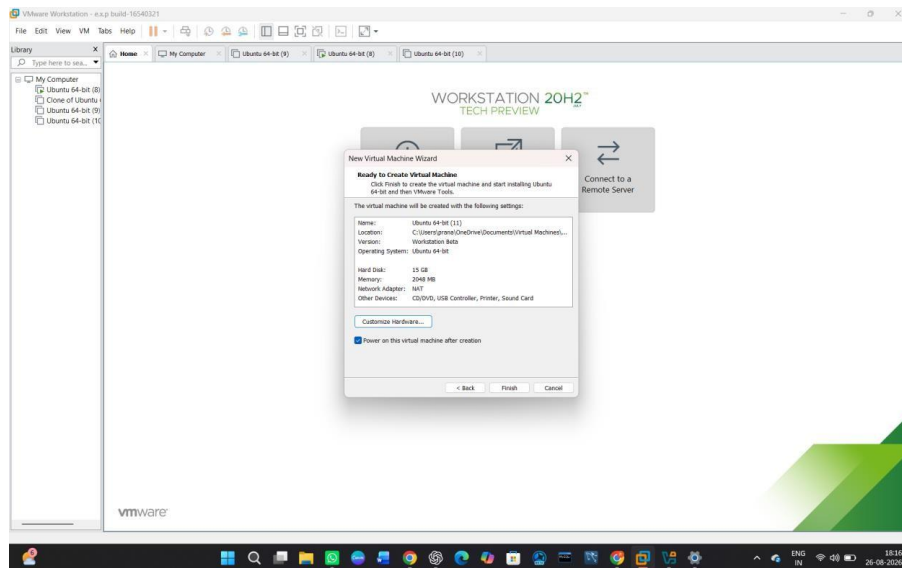

STEP 2: Create a New Virtual Machine

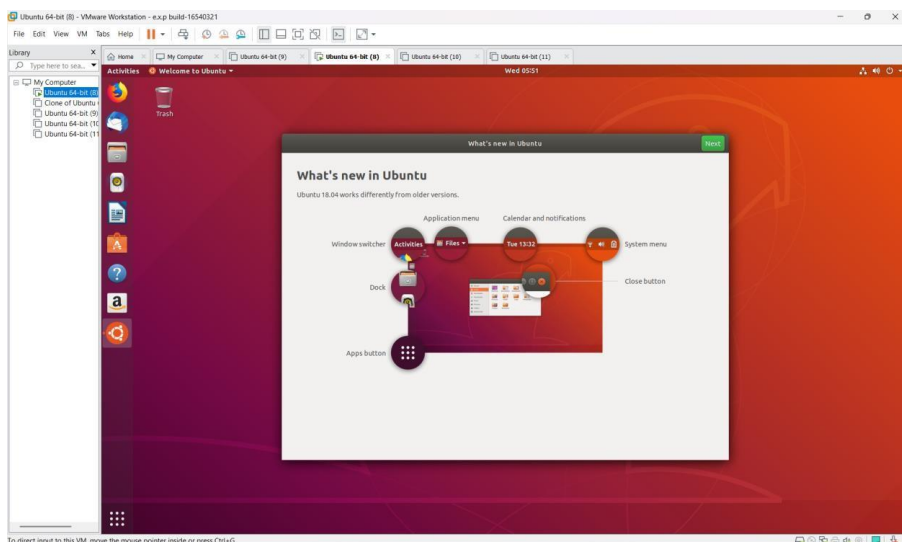

STEP 5: Configure the Virtual Disk

STEP 6: Customize Hardware

STEP 7: Start the Virtual Machine

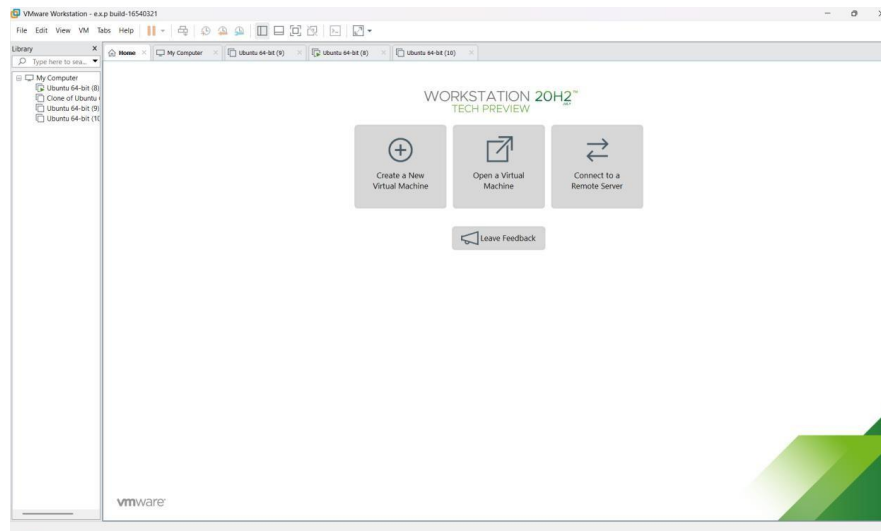

15. Install Virtualbox/VMware Workstation with different flavours of linux or windows OS on top of windows 7 or 8.

AIM:

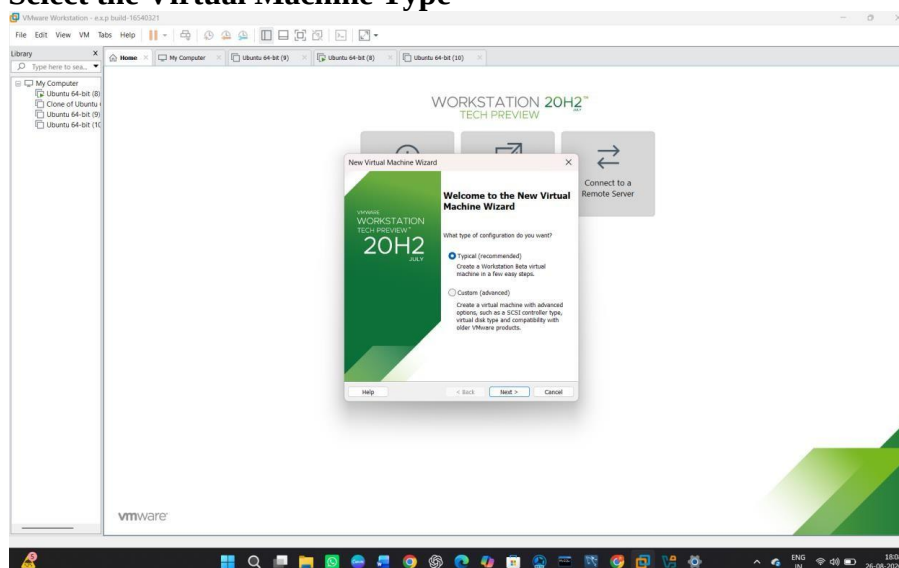

To install VMware Workstation and install a different flavour of Linux/Windows Operating System on top of the existing Windows 7/8 host environment.

PROCEDURE:

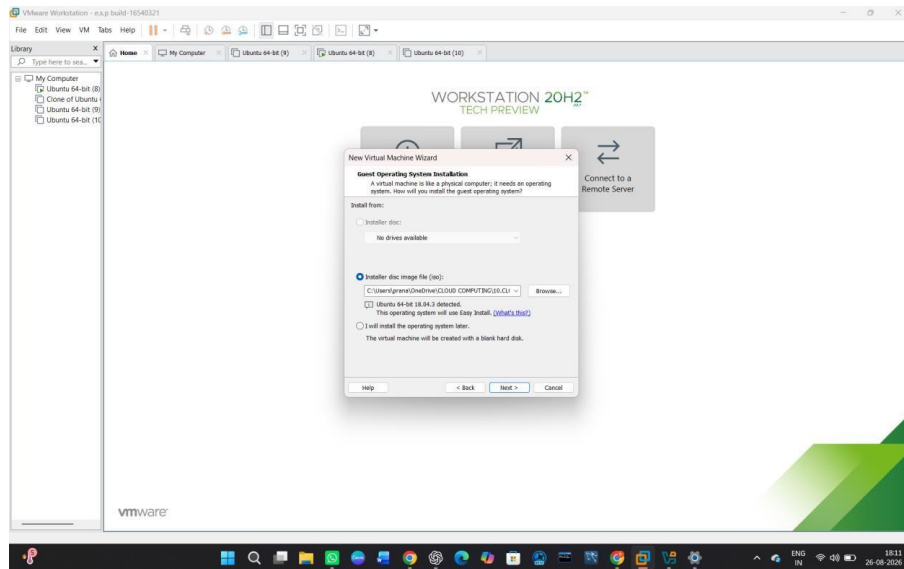

STEP 1: Go to VMware Workstation.

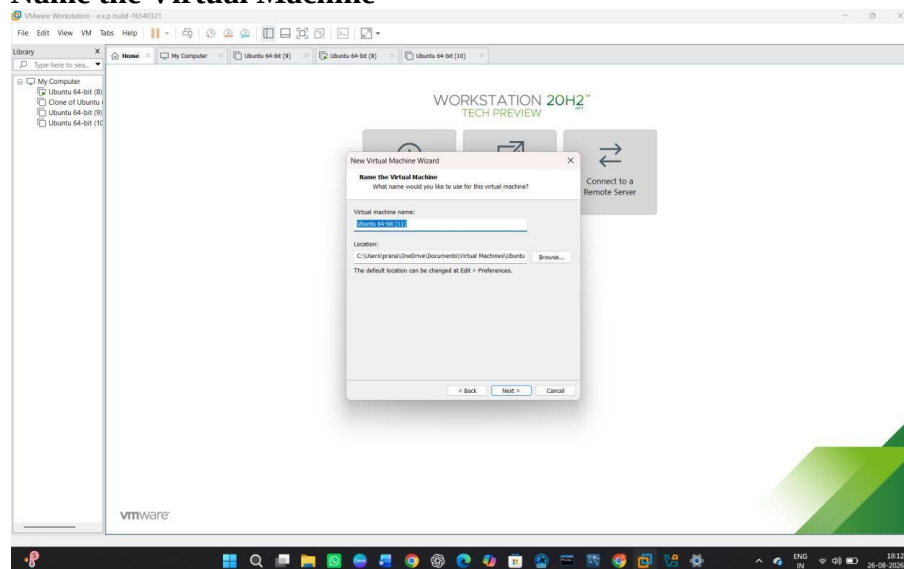

STEP 2 — Select the Virtual Machine Type

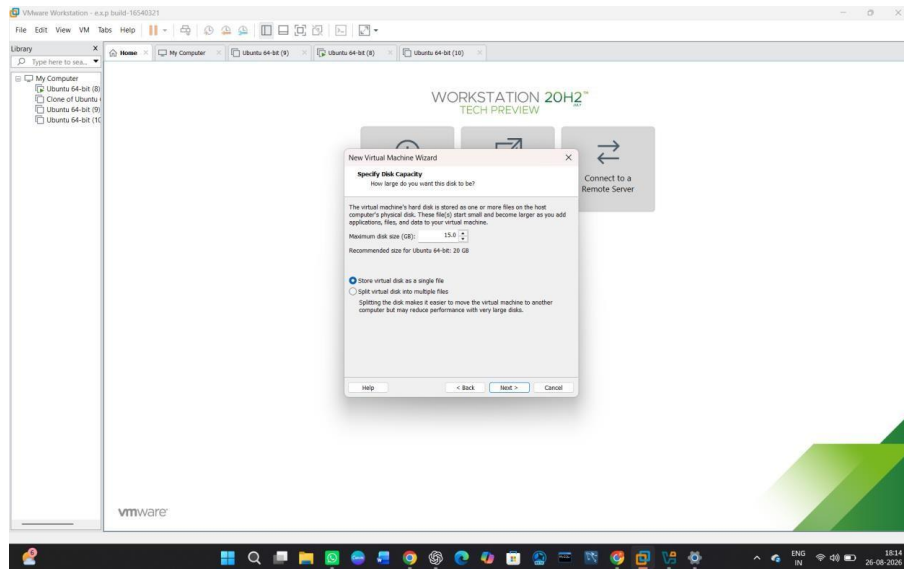

STEP 3 — Select the Ubuntu ISO

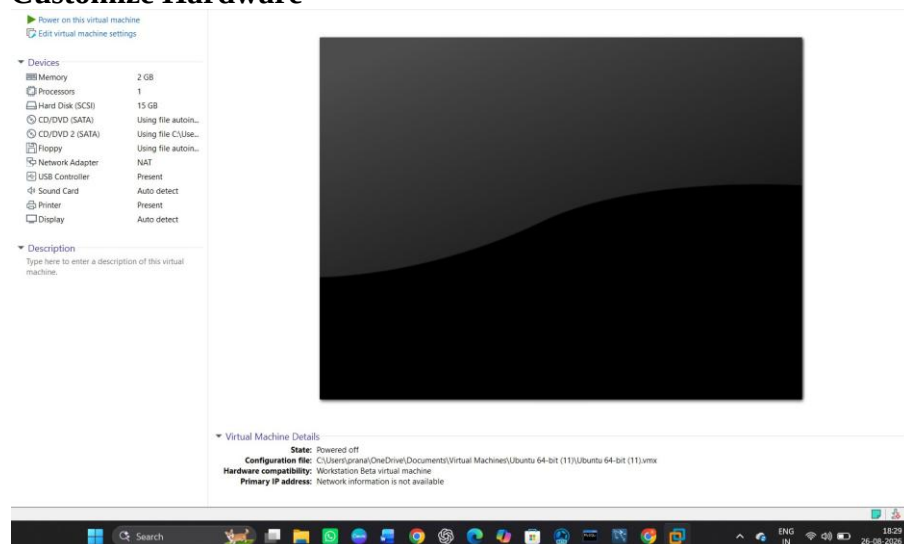

STEP 4 — Name the Virtual Machine

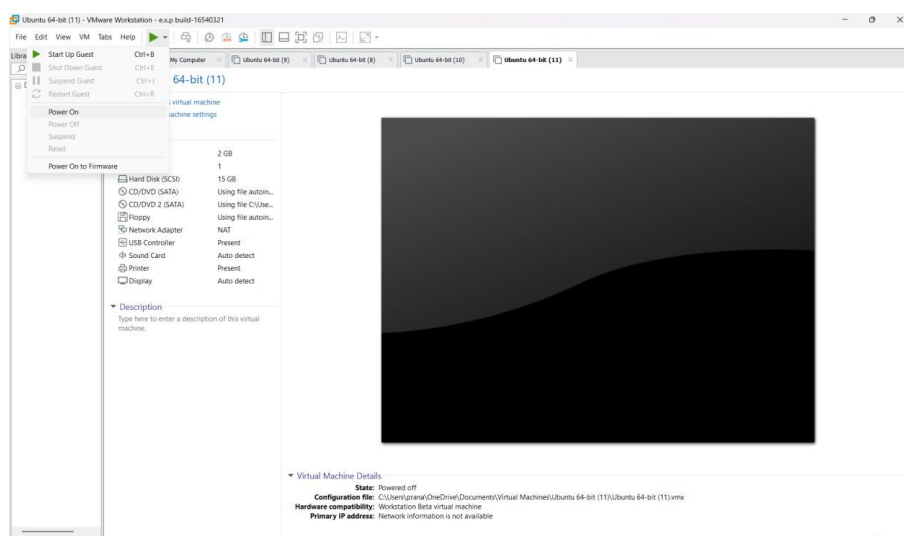

STEP 5 — Configure Disk Capacity

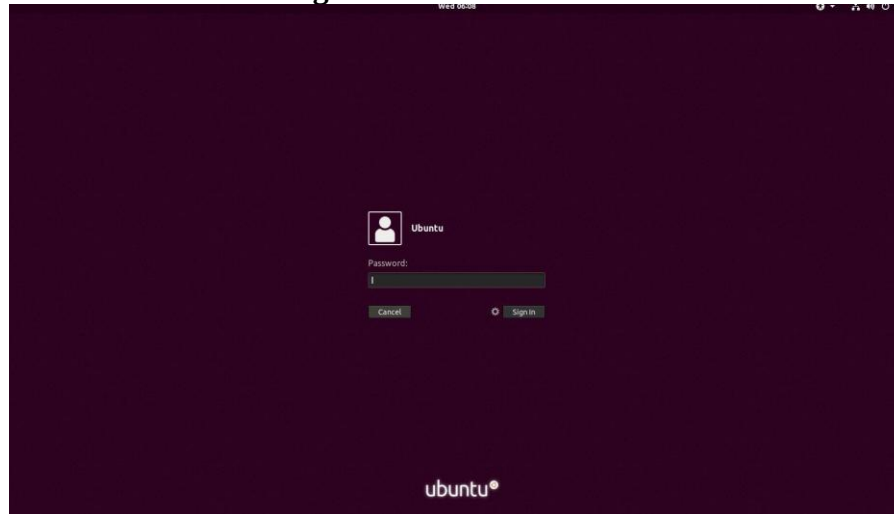

STEP 6 — Customize Hardware

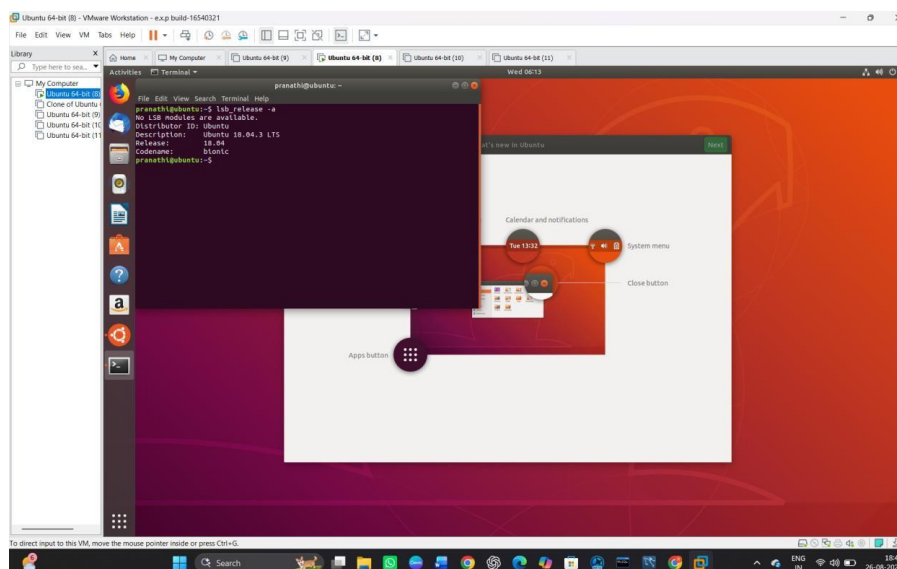

STEP 7 – Power On the Virtual Machine

STEP 8 — Install Ubuntu and Login

STEP 9 – Verify the Installation

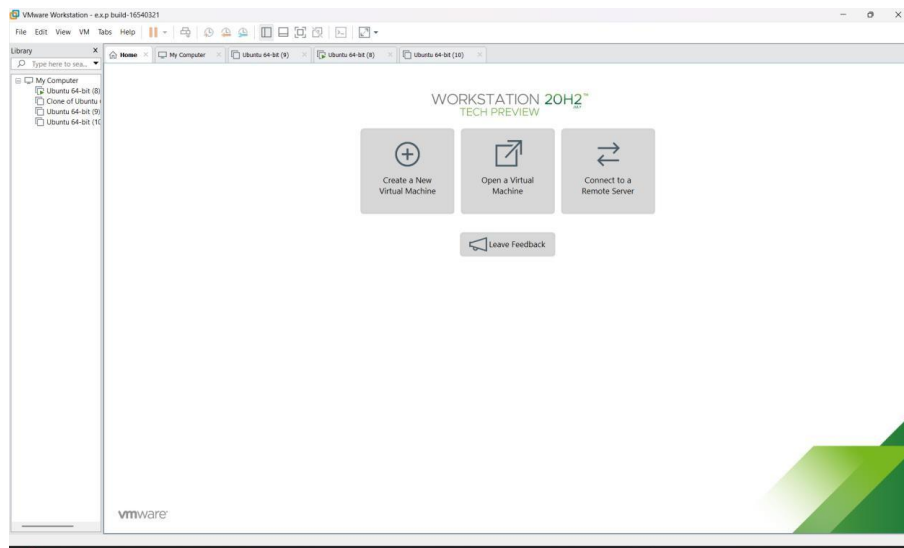

16.To write a procedure to run the virtual machine of different configuration and to check how many virtual machines can be utilized at a particular time.

AIM:

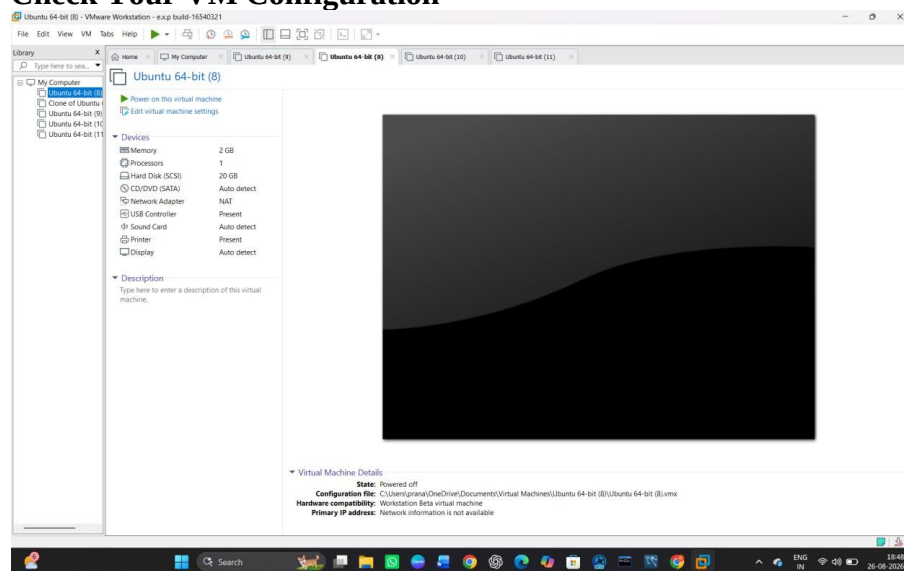

To run virtual machines with different configurations and determine how many virtual machines can be utilized simultaneously on a host system.

PROCEDURE:

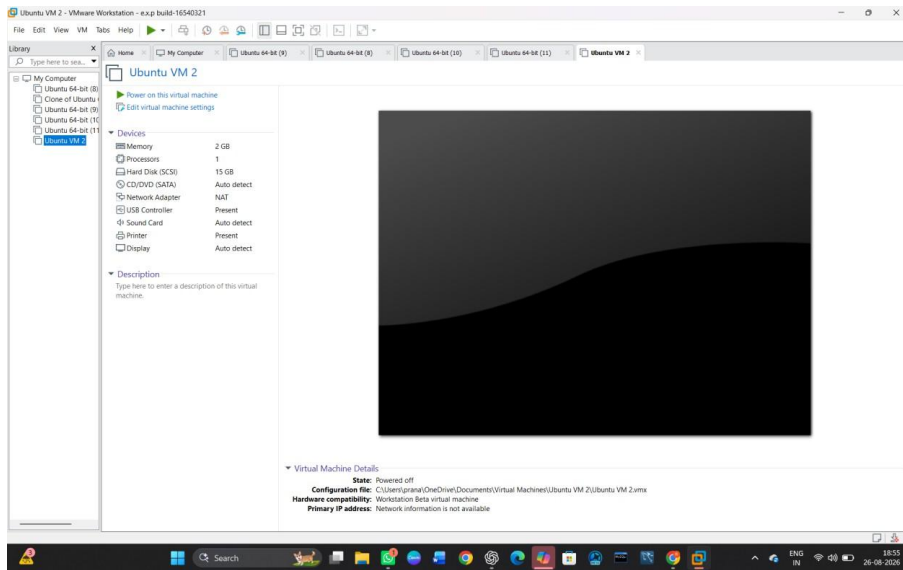

STEP 1— Go to VMware Workstation.

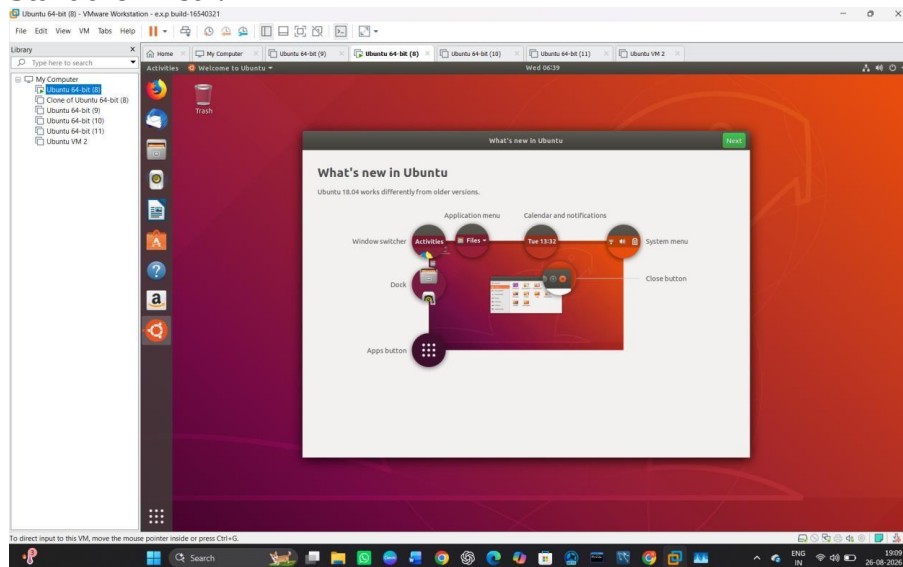

STEP 2 — Check Your VM Configuration

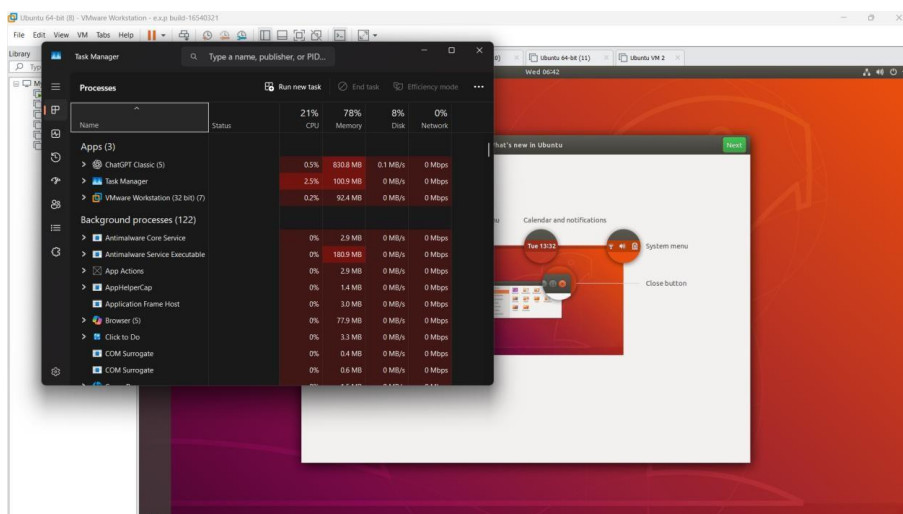

STEP 3 — Create the Second Virtual Machine

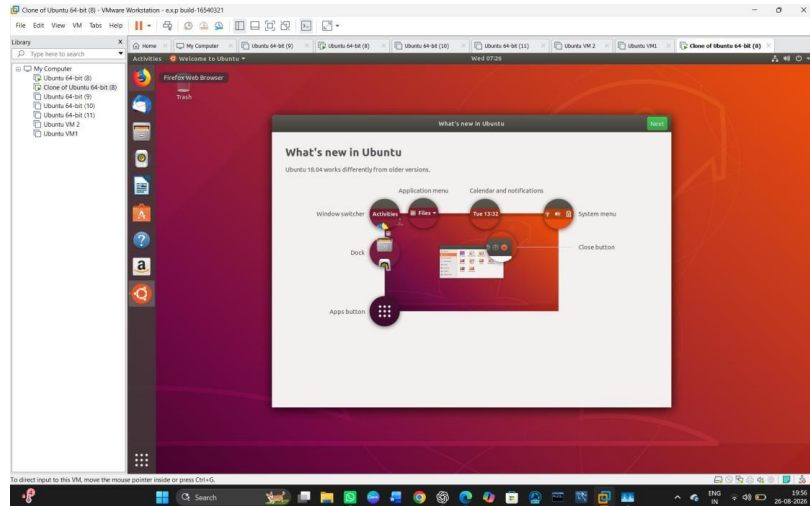

STEP 4 — Start the First VM

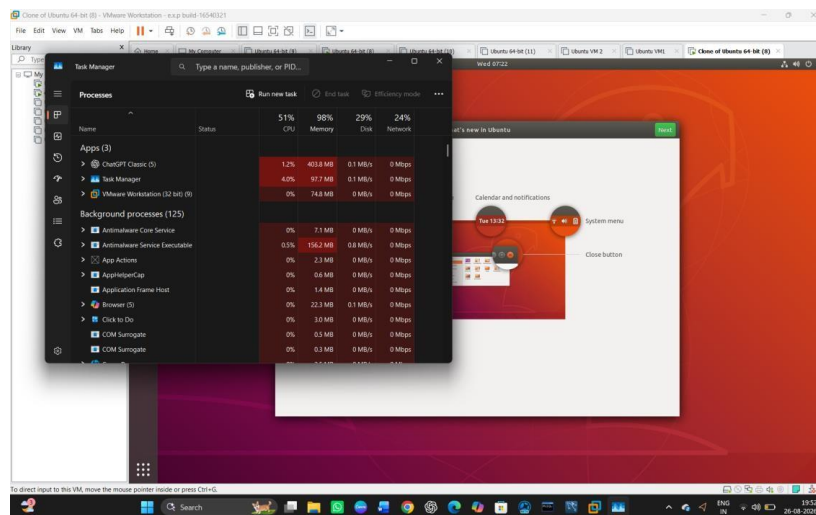

STEP 5 — Check the Host Resources

STEP 6 — Start the Second VM

STEP 7 — Check the Second VM

Result

Two virtual machines were successfully run simultaneously using VMware Workstation. The CPU and memory utilization were monitored using Windows Task Manager. When two VMs were running, memory utilization reached 98%, showing that the available system resources limited the number of VMs that could be utilized simultaneously.

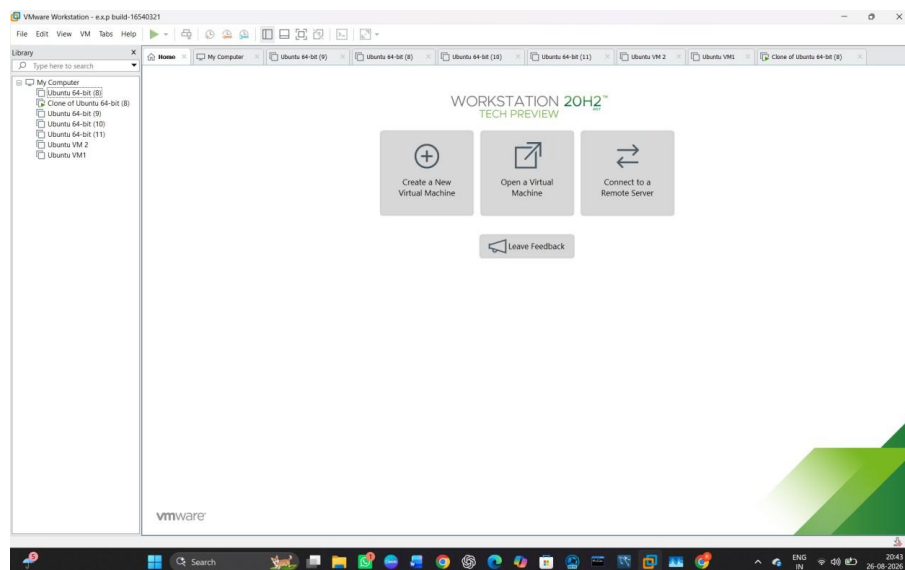

17. Write a Procedure To Attach Virtual Block To The Virtual Machine And Check Whether It Holds the Data Even After The Release Of The Virtual Machine

AIM:

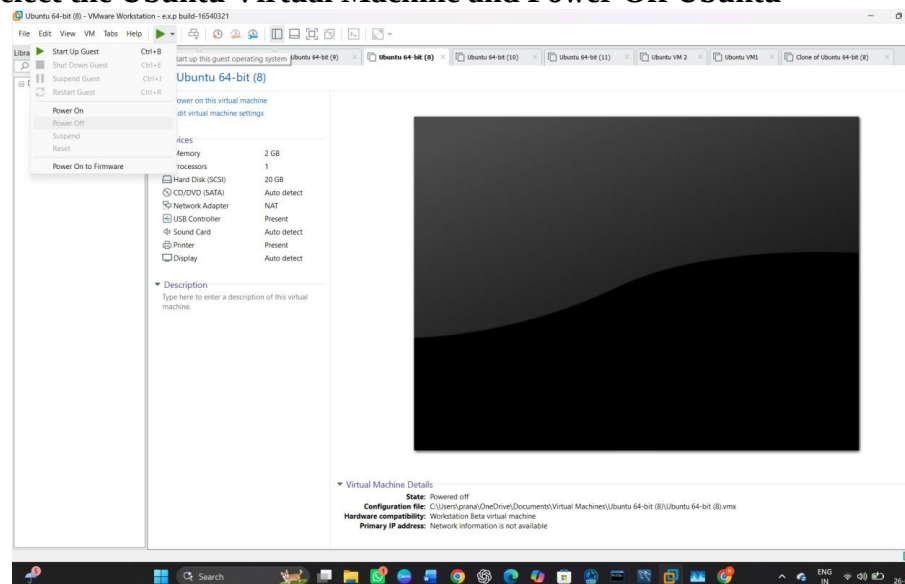

To attach a virtual block storage disk to a virtual machine, store data in it, release/detach the virtual machine, and verify that the data is retained.

PROCEDURE:

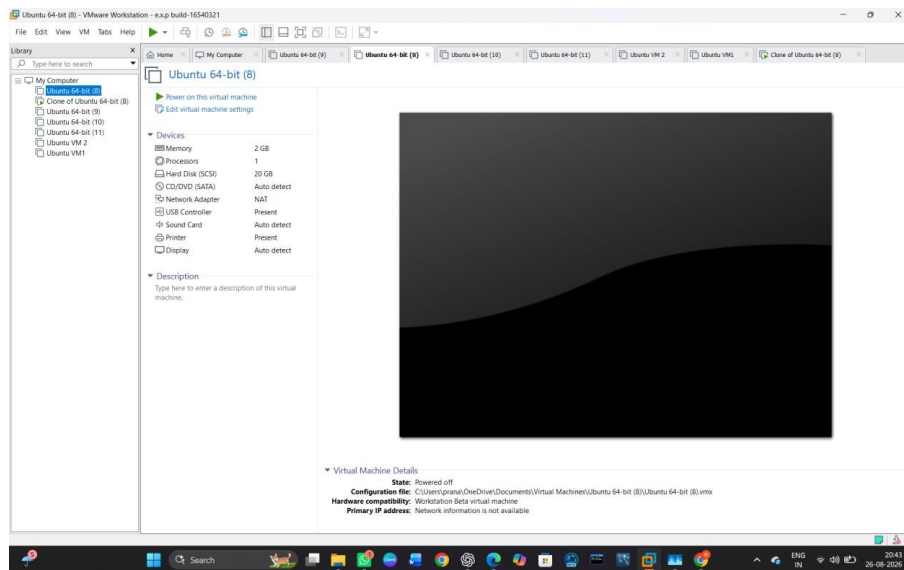

STEP 1: Open VMware Workstation.

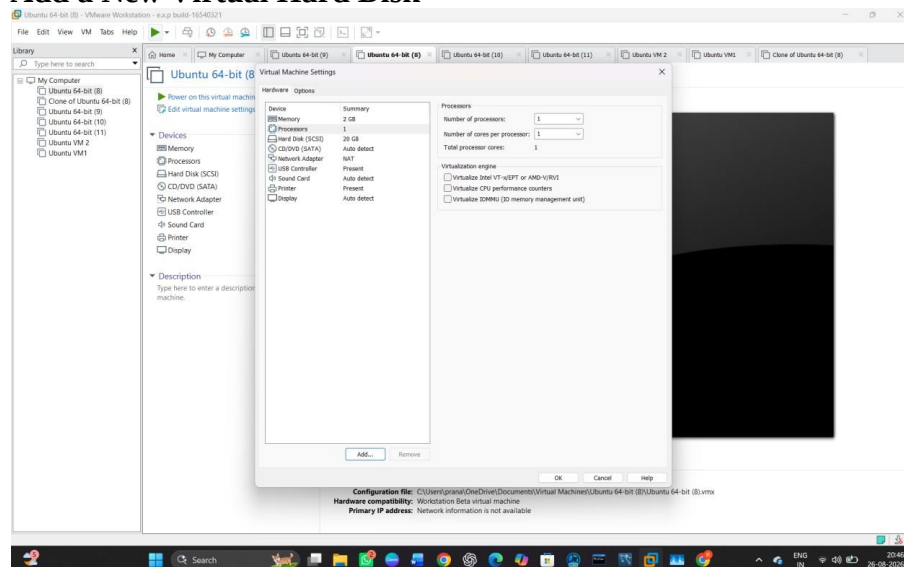

STEP 2: Select the Ubuntu Virtual Machine and Power Off Ubuntu

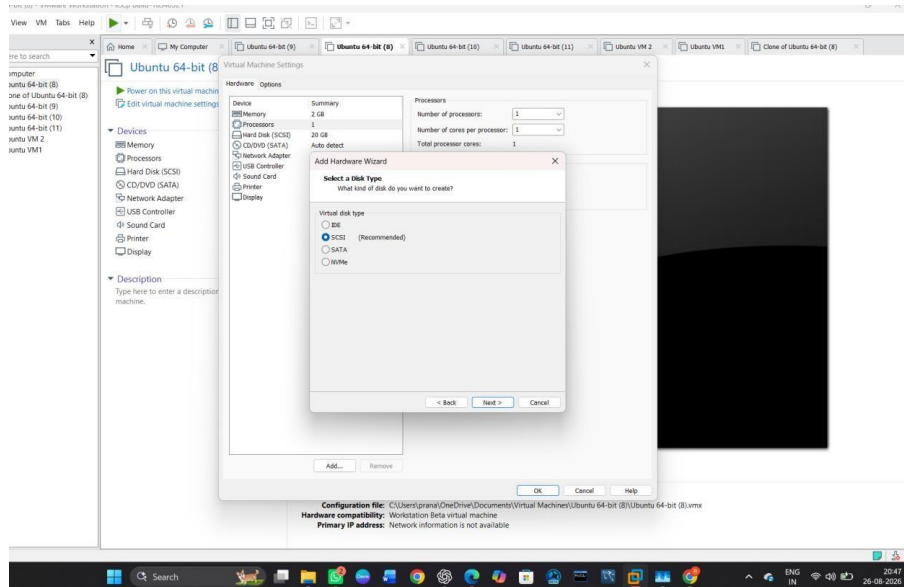

STEP 3 — Open Virtual Machine Settings

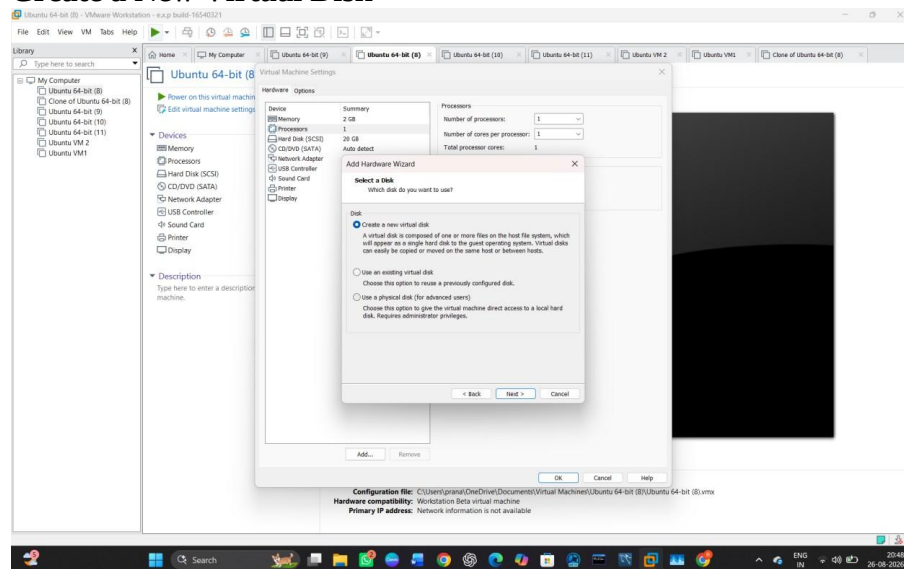

STEP 4 — Add a New Virtual Hard Disk

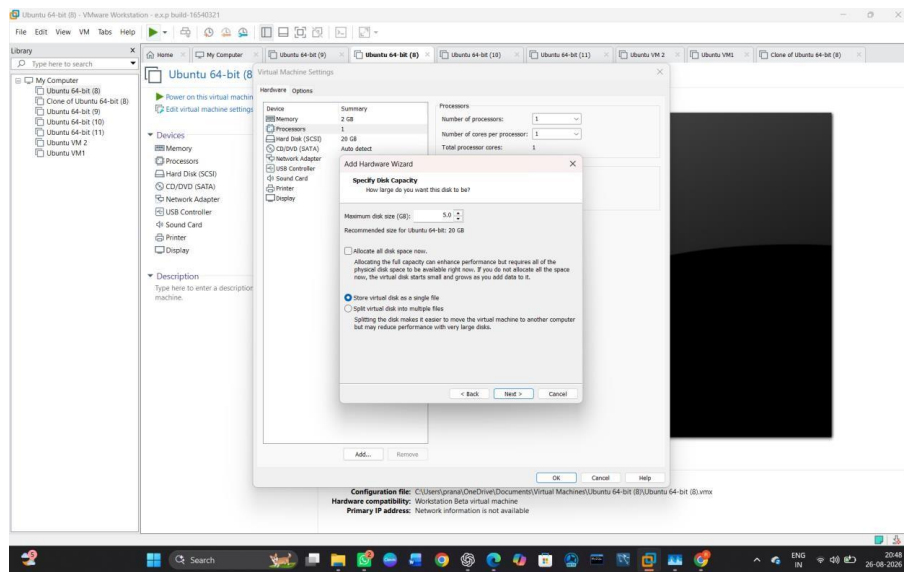

STEP 5 — Select Disk Type

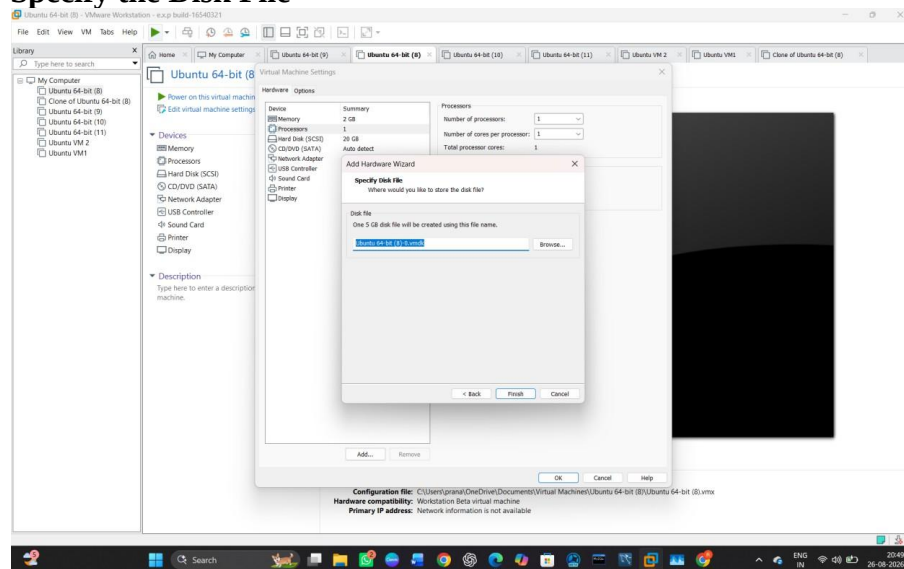

STEP 6 — Create a New Virtual Disk

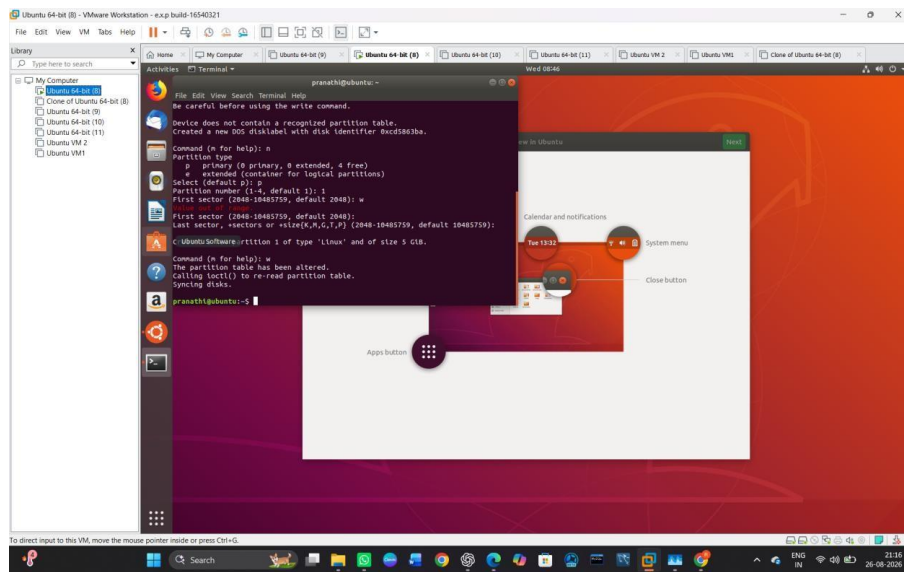

STEP 7— Set Disk Capacity

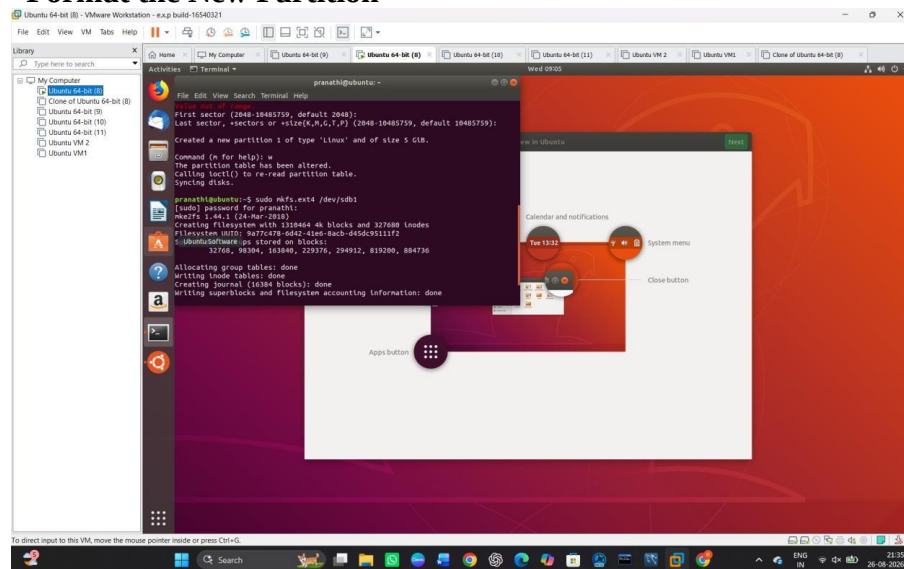

STEP 8 — Specify the Disk File

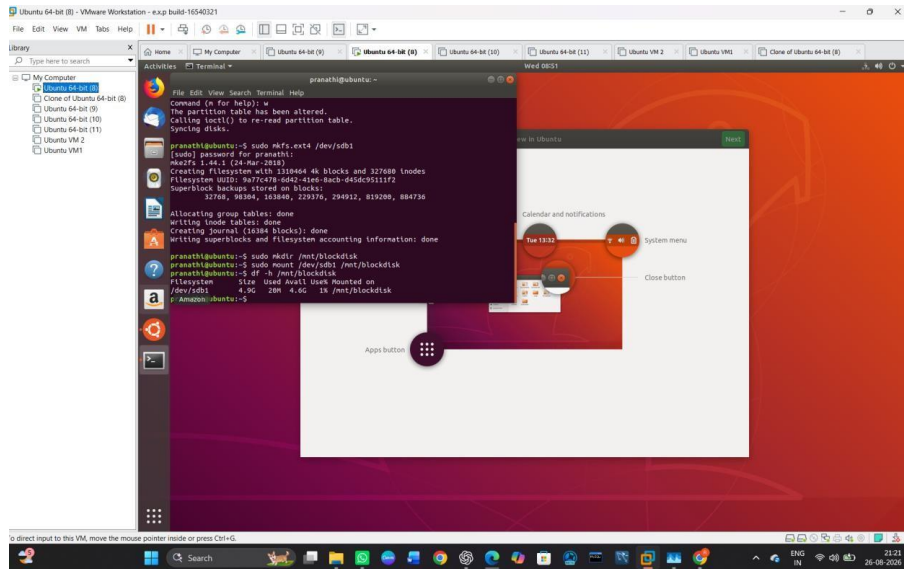

STEP 9 — Confirm the New Disk

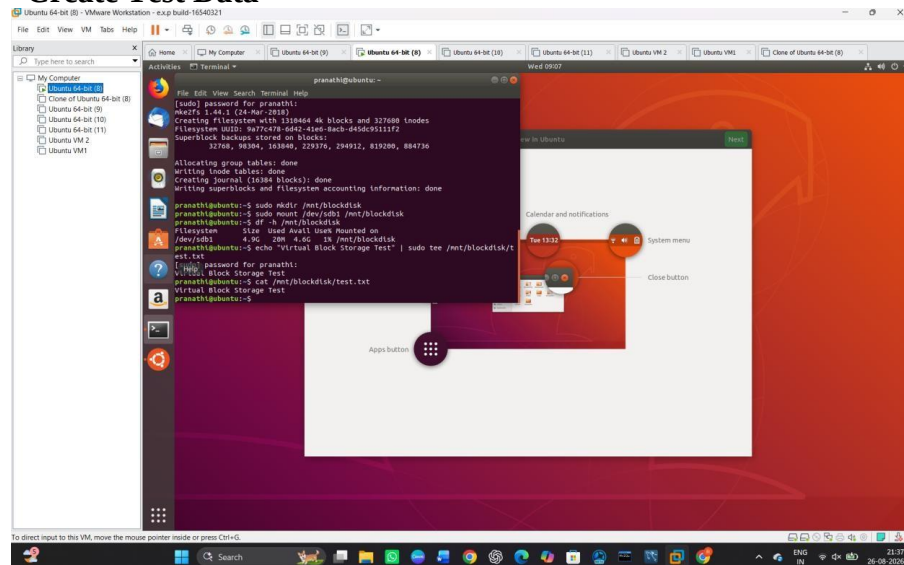

STEP 12 — Format the New Partition

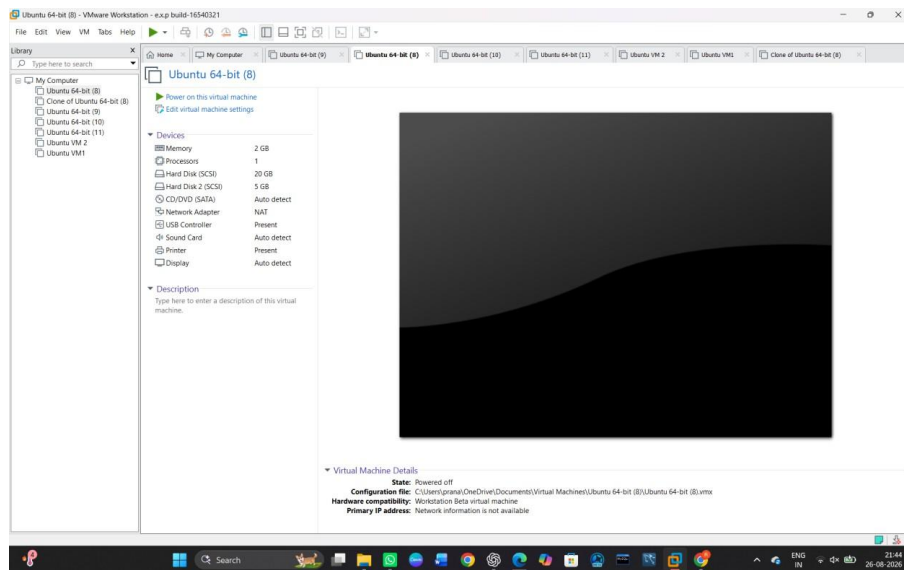

STEP 13 — Create a Mount Point

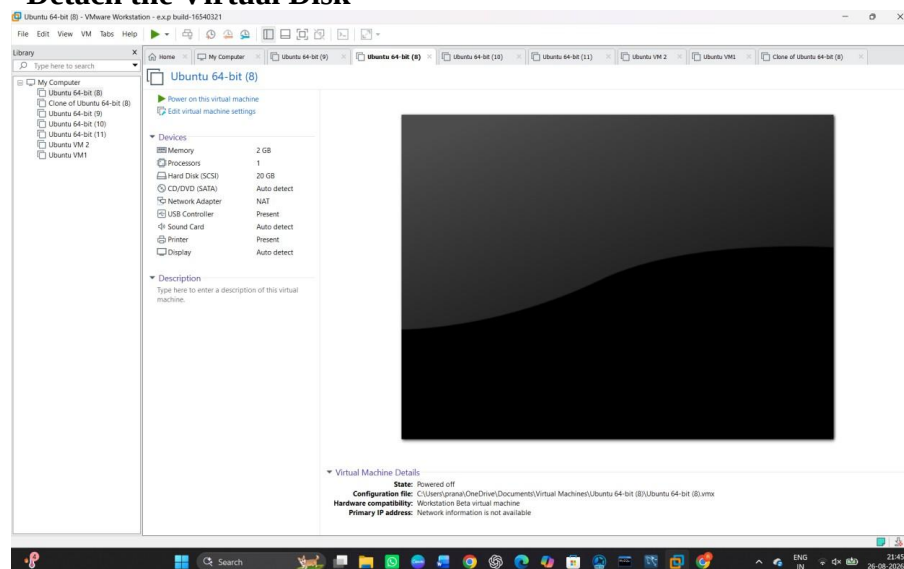

STEP 14 — Create Test Data

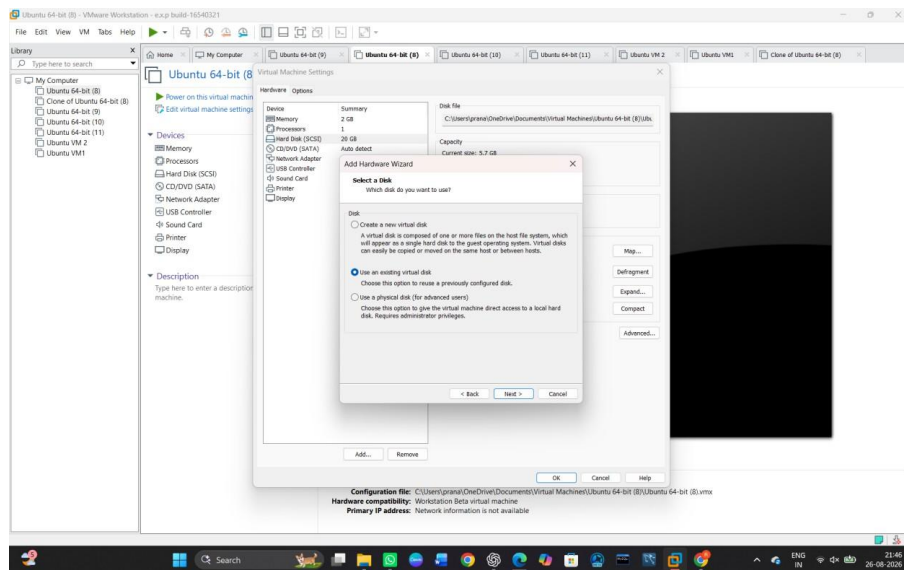

STEP 15 — Shut Down the Virtual Machine

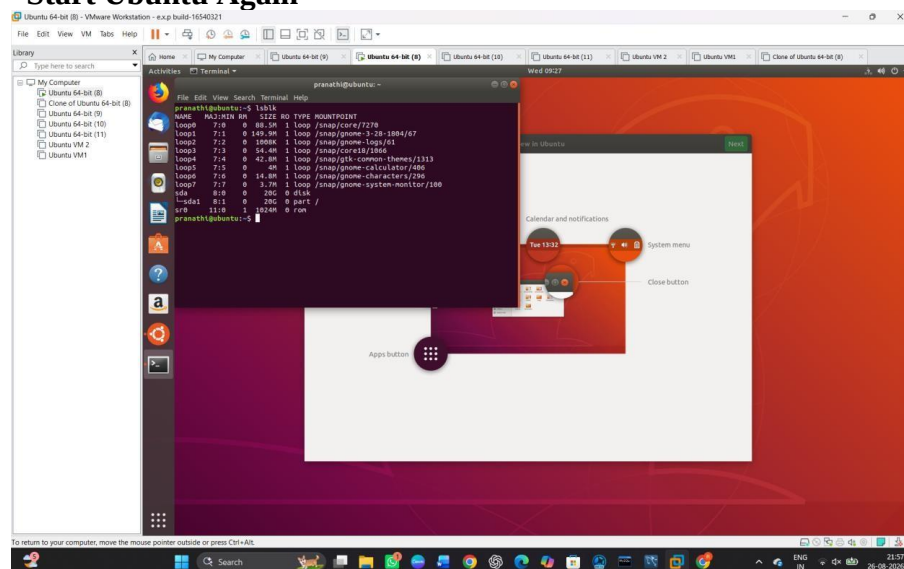

STEP 16 — Detach the Virtual Disk

STEP 17 — Attach the Existing Virtual Disk

STEP 18 — Start Ubuntu Again

Result

The virtual block disk was successfully attached to the virtual machine. Data was stored on the disk, the disk was detached and reattached, and the previously stored data was successfully recovered. Hence, the virtual block storage retains data even after the release of the virtual machine.

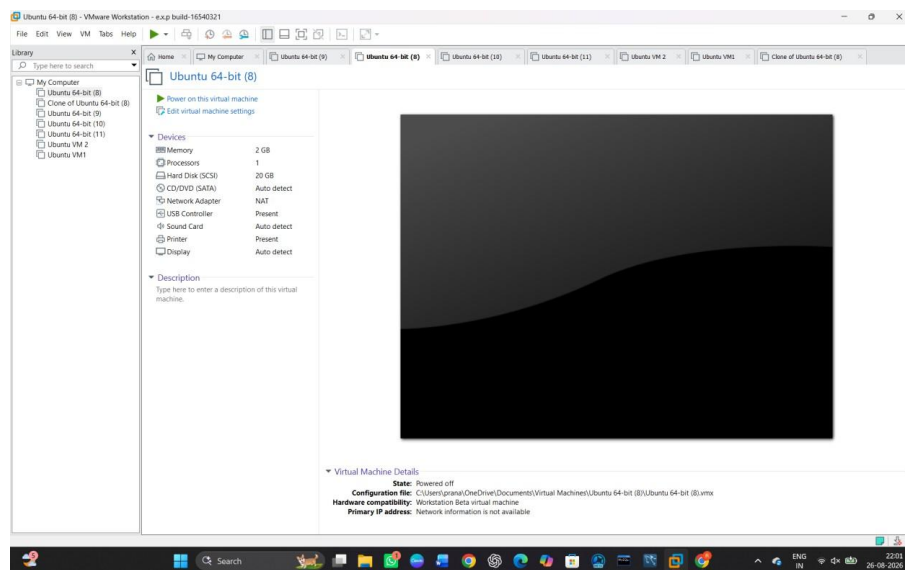

18.To showcase the virtual machine migration based on the certain condition from one host to the other.

AIM:

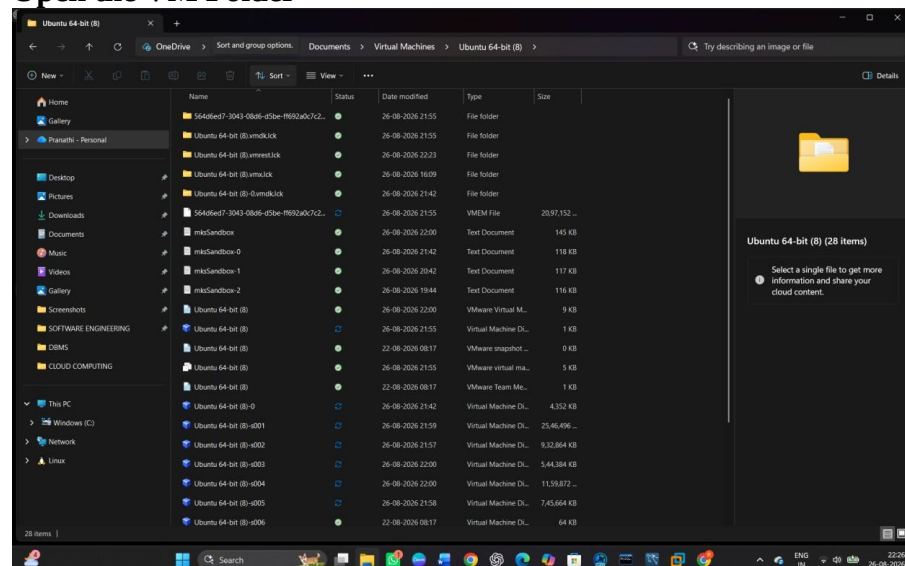

To showcase virtual machine migration from one host to another based on a certain condition.

Procedure:

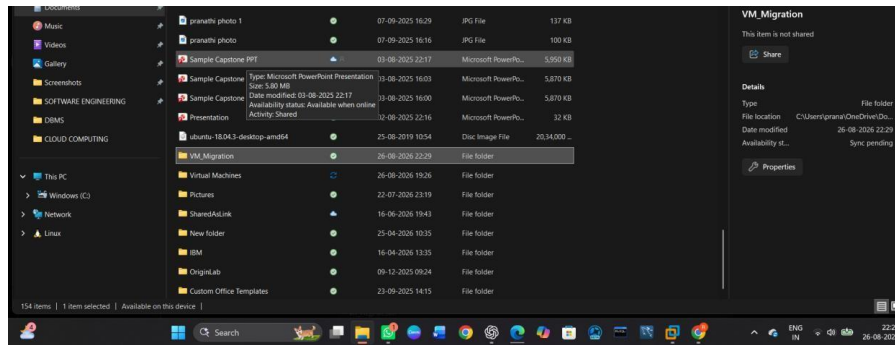

STEP 1 — Prepare the Source VM

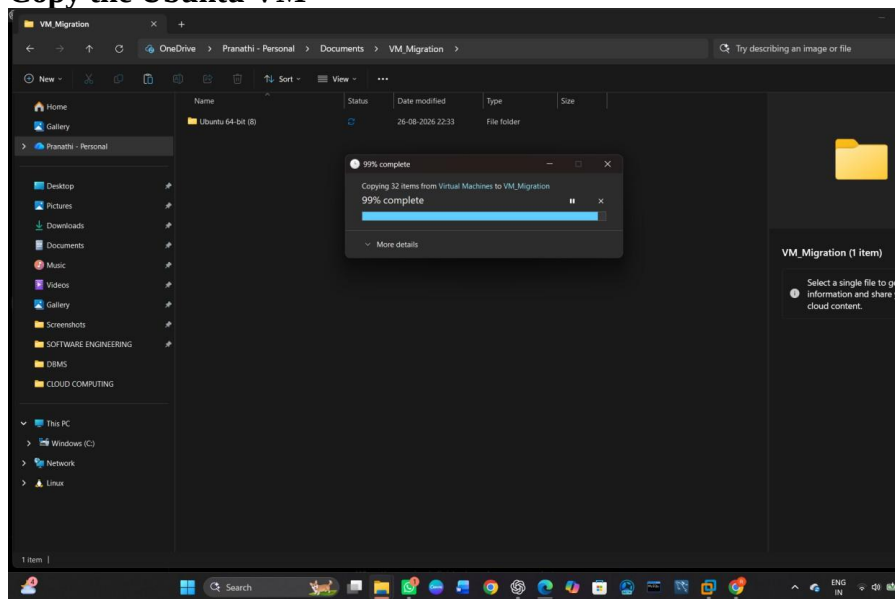

STEP 2 — Open the VM Folder

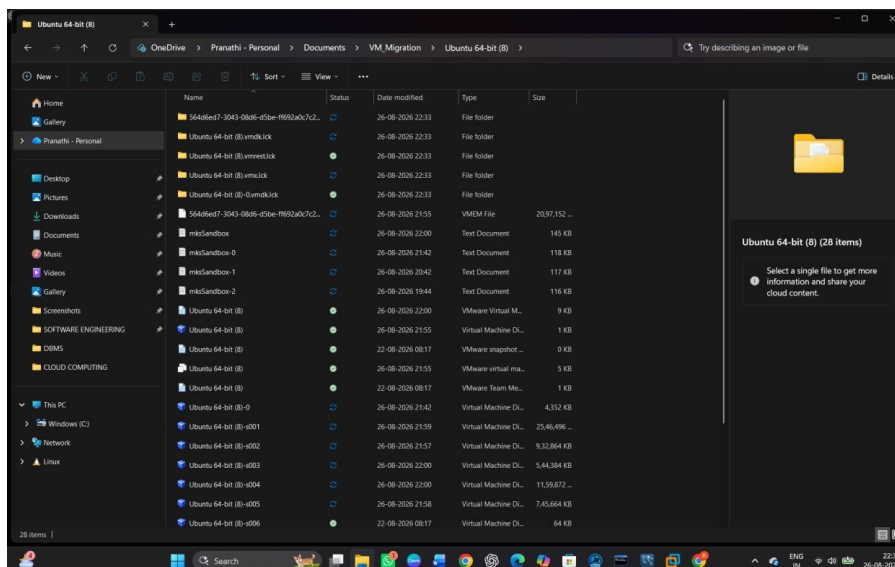

STEP 3 — Create the Destination Folder

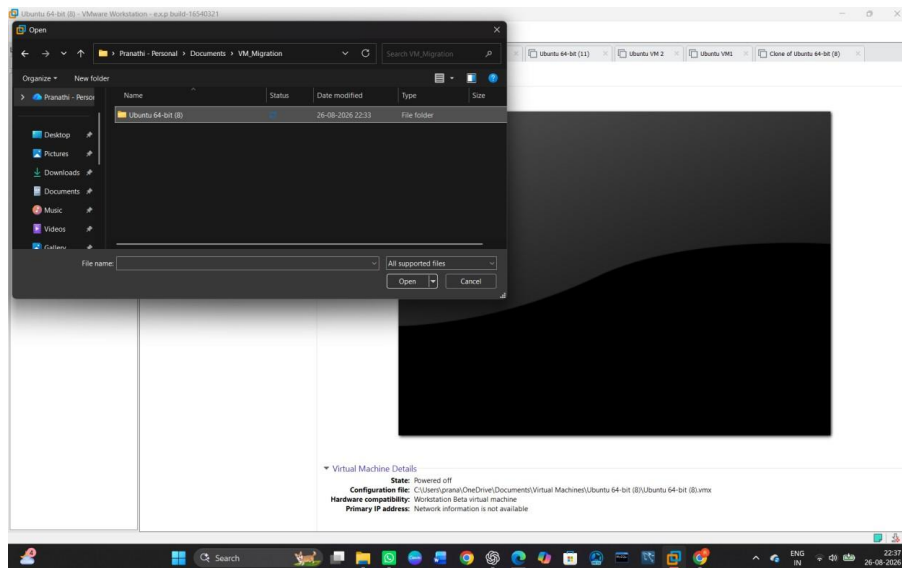

STEP 4 — Copy the Ubuntu VM

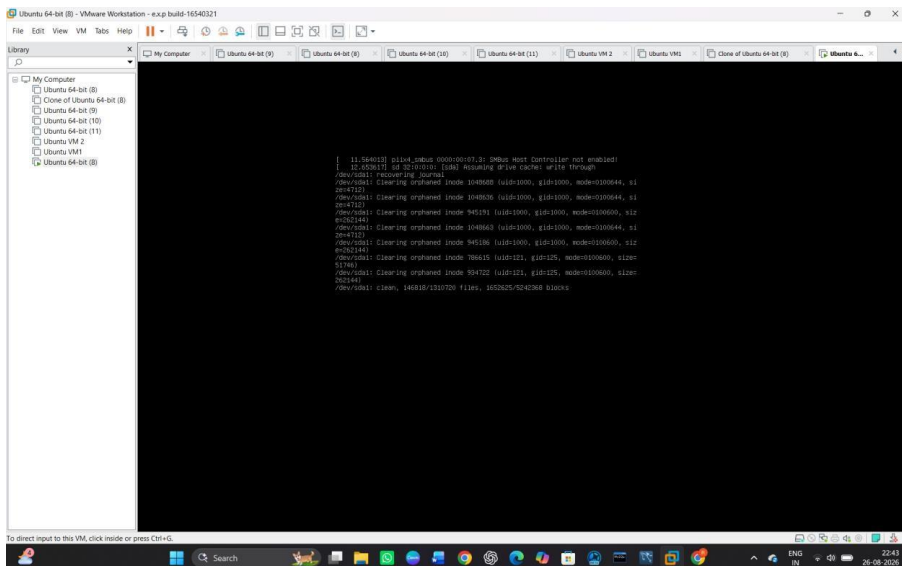

STEP 5 — Open the Copied VM Folder

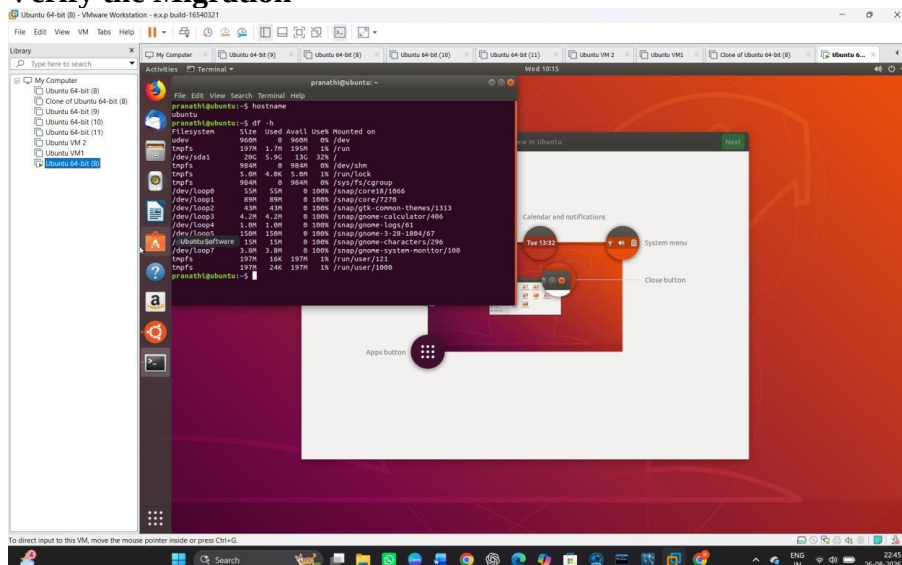

STEP 6 — Load the migrated VM in VMware Workstation.

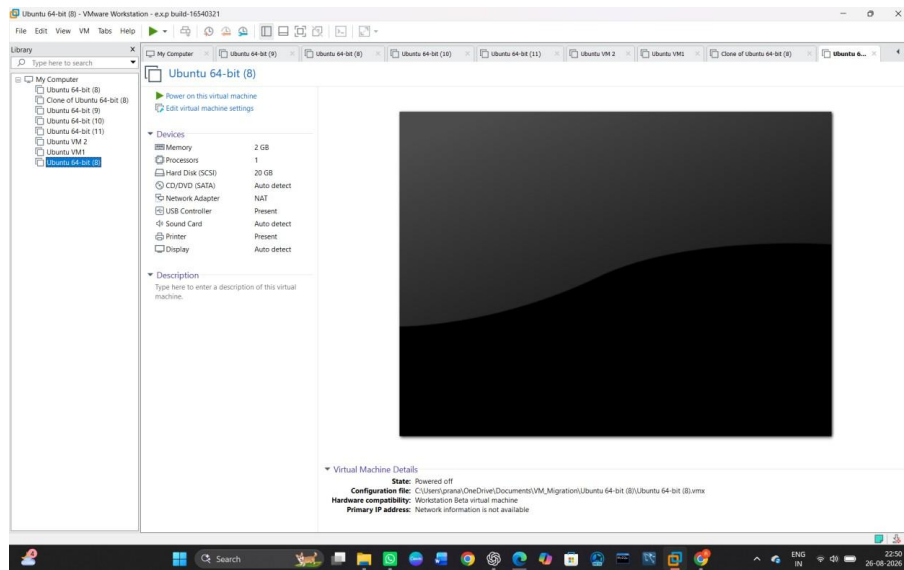

STEP 7 — Start the Migrated VM

STEP 8 — Verify the Migration

STEP 9 — Shut Down the Migrated VM

STEP 10 — Final Verification
